GENERAL INFORMATION

ON-SITE REGISTRATION HOURS

THURSDAY

November 13

7:00am - 9:00am

1:00pm - 8:00pm

FRIDAY

November 14

7:00am - 6:00pm

SATURDAY

November 15

7:30am - 6:00pm

SUNDAY

November 16

7:30am - 4:00pm

EXHIBIT HALL HOURS

THURSDAY

November 13

Exhibit Hall Grand Opening

6:00pm - 8:00pm

FRIDAY

November 14

9:00am - 6:00pm

SATURDAY

November 15

9:00am - 6:00pm

SUNDAY

November 16

9:00am - 2:00pm

REGISTRATION

Attendees will be required to sign in at the registration desk and in the lab rooms before participating.

LAB TICKETS

Check your welcome letter for the list of labs for which you registered. Lab attendees' names will be on a sign in sheet in the lab room. Be sure to sign in! To register for an available lab on-site, visit the registration desk.

CONTINUING EDUCATION CREDITS

Attendees of the Veterinary Dental Forum can earn up to 26 hours of Continuing Education. A certificate is provided in your attendee packet. Attendees must sign an attendance roster at registration for possible replacement of lost CE forms in the future.

NAME BADGES

Name badges will be required for participation in all sessions, workshops, laboratories and the exhibit hall. Badges will be included in your conference materials received at the meeting registration desk and are only available for registered attendees and registered guests.

MORNING AND AFTERNOON BREAKS

Morning and afternoon breaks with refreshments will be provided in the Exhibit Hall. On Sunday, the afternoon break will be provided in the Marquis Ballroom Foyer.

LUNCHES

Box lunches were available for pre-purchase on the registration form. Those who purchased the lunches received ticket(s) in their attendee packets. The lunches will be available for pick-up in the exhibit hall. Be sure to bring your ticket! Box lunches will not be available for purchase on-site.

Many other dining options are available in the hotel as well as within a short walk. Please see your attendee packet for a list of nearby options.

CANCELLATIONS AND REFUNDS

Cancellations and refunds are no longer permitted. A charge of \$50 will be assessed for each change made in laboratory selections.

PRINT STATION

To print notes from the proceedings CD, a print station will be located near the VDF Registration Desk for your convenience.

CYBER CAFÉ

The Veterinary Information Network (VIN) is once again sponsoring a Cyber Café which is located in the Marquis Ballroom foyer.

2013 CD

Limited 2013 VDF New Orleans Proceedings CDs will be available for purchase at the registration desk for \$15.00.

NO VIDEOTAPING is permitted in any sessions or labs.

DOOR PRIZE WINNERS will be posted on the memo board located outside the exhibit hall.

TICKETS* for events can be found in your attendee packet.

**Tickets required for On the Cusp Breakfast/Lecture, Welcome Reception, Peter Emily Foundation Dinner and Fun Run/Walk.*

SPECIAL MEETINGS & EVENTS

CURRENT AS OF 10/27/14

Consult a map of the meeting space on page 6 for room locations.

* = Separate, pre-registration or ticket required.

WEDNESDAY, NOVEMBER 12, 2014

6:00pm-10:00pm M104-105 Review & Assessment*
Sponsored by Virbac

THURSDAY, NOVEMBER 13, 2014

7:30am-8:30am IMPERIAL A "On the Cusp" Breakfast*

Sponsored by Merial

If you registered for the Advanced lecture "On the Cusp," there will be a buffet breakfast which will begin at 7:30am.

8:30am-10:30am IMPERIAL A Advanced Lecture "On the Cusp"*

10:30am-12:00pm IMPERIAL A Awards Ceremony

12:00pm-2:00pm IMPERIAL A AVD General Meeting

1:00pm-4:45pm INTERNATIONAL 4-5 AVDT Member Only Meeting

2:00pm-4:30pm IMPERIAL A AVDC Annual Business Meeting

4:30pm-6:00pm IMPERIAL A AVDS General Meeting

4:30pm-6:30pm M102 Annual Meeting for the AVDC Equine Specialty

5:00pm-6:00pm INTERNATIONAL 4-5 AVDT Pinning Ceremony

6:00pm-8:00pm MARQUIS BALLROOM Exhibit Hall Grand Opening and Reception*

FRIDAY, NOVEMBER 14, 2014

6:30am CENTENNIAL OLYMPIC PARK Fun Run/Walk*

Started in the '80s, the run/walk has been growing and improving ever since. This is an opportunity for attendees to take a break from the educational sessions and experience a sports landmark dedicated to the elite athletes of the 1996 Olympics. Participants can also win great prizes donated by our generous exhibitors! More information, including the route, is provided in participants' attendee packets.

12:00pm-1:00pm INTERNATIONAL 8 World Veterinary Dental Congress Delegates Meeting

12:10pm-2:10pm M102 Veterinary Dental Educators Meeting

12:10pm-1:10pm IMPERIAL A AVDC Exam Q&A

3:00pm-3:30pm MARQUIS BALLROOM FOYER Posters Q&A Session

6:00pm-10:00pm 200 PEACHTREE EVENT CENTER Dinner/Auction Event to honor Dr. Peter Emily, Founder and Co-Chair of the Peter Emily International Veterinary Dental Foundation (PEIVDF)*

SATURDAY, NOVEMBER 15, 2014

7:15am-8:00am M106-107 Advanced Standing, Credentialing, Training and Certifying Examination Information for the Equine Dental Specialty Meeting

9:50am-10:20am MARQUIS BALLROOM FOYER Posters Q&A Session

12:10pm-1:10pm M103-105 Information Meeting for Veterinarians Considering Pursuing Certification by AVDC and/or the AVD

12:10pm-1:10pm M106-107 Foundation for Veterinary Dentistry Meeting

5:30pm-6:30pm INTERNATIONAL 6 AVDC Informational Meeting for AVDC Trainees with Training Support Committee (TSC) and Credentials Committee (All AVDC Trainees, particularly those planning to submit a credentials application in 2015, are encouraged to attend.)

5:30pm-6:30pm M103-105 AVDT General Interest Information Meeting

SUNDAY, NOVEMBER 16, 2014

6:30am-8:00am M103-105 AVDT Mentees Meeting

Light breakfast sponsored by Midmark

7:00am-8:00am IMPERIAL A AVD Trackers Information Meeting

GUEST SPEAKERS

Advanced Lecture “On the Cusp”

Thursday, November 13

8:30am-10:30am

IMPERIAL A

This is a ticketed event.

The “New” Periodontal Disease: “Inflammatory and Risky”

Samuel B. Low, DDS, MS, MEd,

Professor Emeritus, University of Florida, College of Dentistry

The focus of the presentation will be periodontitis. Periodontitis has entered into a new frontier as not only a major chronic infection but a disease of inflammation. Recent studies demonstrate the parallel nature of periodontitis with a similar inflammatory cascade of chronic inflammatory diseases such as diabetes and rheumatoid arthritis. Likewise, periodontal therapy protocols have moved from a “treatment” orientation to one of “management” and therefore emphasis to host modulation including nutraceuticals and antioxidants over singular antimicrobial strategies. We consider not only the biofilm as an etiology but genetics and the epigenetic involvement of risk factors to determine the prognosis of retaining the dentition.

The guest lecturer is Samuel B. Low, DDS, MS, MEd, Professor Emeritus, University of Florida, College of Dentistry; Associate faculty member of the Pankey Institute with 30 years of private practice experience in periodontics, lasers and implant placement. He is also a Diplomate of the American Board of Periodontology and Past President of the American Academy of Periodontology. Dr. Low provides dentists and dental hygienists with the tools for successfully managing the periodontal patient in general and periodontal practices and is affiliated with the Florida Probe Corporation. He was selected “Dentist of the Year” by the Florida Dental Association, Distinguished Alumnus by the University of Texas Dental School, and the Gordon Christensen Lecturer Recognition Award. He is a Past President of the Florida Dental Association and past ADA Trustee.

Specialist in Training - Anesthesia

Saturday, November 15

8:00am-5:00pm

INTERNATIONAL 7

This course attendance is limited to AVDC Trainees only and requires an additional registration fee.

Monitoring and Complications and Discussion on Geriatric Cases and Use of Pulse Oximetry

Jane E. Quandt, DVM, MS, DACVAA, DACVECC (Anesthesia & ECC)

Associate Professor, University of Georgia

Dr. Quandt earned her DVM in 1987. She graduated from Iowa State University. She completed her Anesthesia residency and MS in anesthesia at the University of Minnesota. Dr. Quandt was boarded in Anesthesia in 1993. She completed a critical care residency at UC Davis, and was boarded in critical care in 2007.

Anesthesia Machines, Local Anesthetics Actions and Dental Blocks and Discussion on Interpretation of ECG’s, the Use of Capnography and Analgesia Treatments for Post-operative Patients

Mike Barletta, DVM, MS, Ph.D, DACVAA

Assistant Professor, University of Georgia

Dr Barletta graduated from the University of Turin, Italy in 2002, where he completed his PhD in veterinary oncology in 2006. He moved then to the United States where he completed a rotating internship in small animal medicine and surgery at Purdue University in 2007. After his internship he stayed at Purdue University for his anesthesiology residency and Master’s degree. He worked at the University of Minnesota for three years as Assistant Clinical Professor in anesthesia before joining the University of Georgia.

9. Advances in our Understanding of the Bacteria Associated with Canine Periodontal Disease (C Wallis)

Authors will be by their posters for Question & Answer Sessions during the afternoon break on Friday and the morning break on Saturday.

ProDen PlaqueOff™ Animal

100%
ALL NATURAL
100%
HUMAN-GRADE

A unique oral care product that does not require chewing, brushing, or topical action.

Effective against bad breath, plaque and tartar, the single ingredient works systemically to break down the biofilm on the teeth and gums.

Unconditionally guaranteed to improve bad breath and reduce or soften plaque and tartar in 2-8 weeks*.

- **Easy to use** - Simply sprinkle on dry or wet food once a day
- **Palatable** - For both Dogs & Cats
- **Always working** - As long as PlaqueOff™ is maintained it is always working
- **Human Grade** - Invented for humans, safe for animals
- **Award Winning** - Voted best health product 7 years in a row by UK's largest pet magazine, Your Dog Magazine
- **100% Guaranteed**

AN INNOVATION IN ORAL HEALTH CARE!

LABORATORIES AND SCHEDULE

SUBJECT TO CHANGE

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet-labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Tickets are no longer required for entrance in labs.

Pre-registered attendees will be required to sign in at each lab.

Canine Surgical Extractions Lab I - This lab will focus on surgical tooth extraction techniques and instrumentation in the canine patient. Participants will learn and practice flap design, appropriate use and handling of instruments, use of high speed hand piece and burs to section teeth and perform bone removal, root elevation techniques, and closure of mucosal flaps. **(DVMs ONLY)** Limited to 30 participants.

Canine Extractions Lab II - This hands-on laboratory will focus on the proper techniques and instrumentation of common dental extractions in dogs. An emphasis will be placed on operator and patient safety as well as methods to minimize complications. It is oriented towards the beginner but those at an intermediate level will also benefit. The lab will start off with a brief introduction and lecture and then move quickly into extractions. Focus will be placed on flap design and proper tissue handling. Extractions performed will include incisors, canine teeth, maxillary fourth premolars, and others as time permits. In summary, our goal is to teach fundamental oral surgery focused on the dental extraction of incisors, canines, premolars and molar teeth. These will include flap design, instrumentation, technique, and closure. **(DVMs ONLY)** Limited to 32 participants.

Comprehensive Periodontal Debridement Techniques & Instrumentation for Treatment & Prevention of Periodontal Disease - This lab covers comprehensive instrument selection, usage and care for treating periodontal disease. It includes use of ultrasonics and hand instruments (curettes/scalers); sharpening techniques; recognizing and charting oral pathology and polishing. Homecare, the mainstay of oral health, is included. This is a hands-on wet lab utilizing extracted teeth, skulls and cadavers and is designed for the veterinarian and technician team. Limited to 32 participants.

Digital Intraoral Photography - This lecture and lab will cover the essentials of digital intraoral photography. If you have a camera, bring your camera, connection cords, camera manual, mirrors, cheek retractors, and any other materials you have to use in the lab. This is a chance for you to learn how to take and work with digital photographs in clinical veterinary dental practice. Limited to 20 participants.

Endodontics and Prosthodontics for the Veterinary Technician (5-hour lab) - Endodontics is the branch of veterinary dentistry that involves the diagnosis and treatment of diseases of the pulp and periradicular tissue. This first of two, two and one-half hour laboratories will demonstrate the variety of methods used to diagnose endodontic disease as well as a variety of procedures that are utilized to treat endodontic disease. These procedures include: vital pulp therapy, conventional root canal therapy, and surgical root canal therapy (apicoectomy). This laboratory will focus on the veterinary dental technician's role in preparing for and assisting in these procedures. Prosthodontics is that branch of dentistry that deals with the artificial replacement of natural teeth or associated structures. Prosthodontics in veterinary dentistry means crowns. There are many cases in veterinary dentistry where crown restoration is indicated. This second two and one-half hour laboratory will demonstrate the techniques involved with preparing teeth for crown restoration, impression taking for crown restoration as well as the procedure for crown cementation. Differences between the various crown choices (full jacket cast metal vs. porcelain) as well as 3/4 crowns will be demonstrated as well. This laboratory will focus on the veterinary dental technician's role in preparing for and assisting

in these procedures. Attending this 5-hour laboratory will provide the required two and one-half hours of training for both the VTS Dentistry Endodontic Laboratory and Prosthodontic Laboratory requirements. Limited to 18 participants.

Endodontics I: Endodontic Access - The primary purpose of this laboratory session is to learn how to perform an appropriate access to root canals, for the purpose of performing root canal therapy on the affected teeth. **(DVMs ONLY)** Limited to 40 participants.

Endodontics II Lab: Canal Cleaning, Shaping, & Obturation - This lab is a continuation of the Endodontics I Lab. It will provide the basics for endodontics including: hand instrumentation of canals, an overview of the instruments used, chemical and mechanical cleaning, and obturation using basic materials such as zinc oxide-eugenol and gutta percha points. We will also introduce and have available other obturation methods such as Successfil and Gutta Flow sealant and gutta percha master point. **(DVMs ONLY)** Prerequisite lecture is *Introduction to Standard Root Canal Therapy*. Limited to 24 participants.

Feline Extractions - Lecture will touch on common feline oral pathology and treatment, radiography for this pathology and the armamentarium necessary to provide surgical extraction of feline teeth. Details on how to perform appropriate surgical extractions and crown amputation of feline teeth will be provided. **(DVMs ONLY)** Limited to 30 participants.

Feline and Canine Extractions - The basic skills and knowledge for successful extraction techniques will be covered, including instrument selection and care. Demonstration and practice will include dog and cat extractions, with flap design and implementation, teeth sectioning and alveoloplasty for access, tooth segment elevation, extraction site prep and closure. Techniques for managing complications such as fractured root tips will also be covered. **(DVMs ONLY)** Limited to 32 participants.

Introduction to Jaw Fracture Repair - This laboratory will focus on the four basic interdental wiring techniques for fractures of the mandible (Ivy loop, Stout, Essig, and Risdon). An introductory lecture will be given before the laboratory. The focus of the lecture will be on non-invasive fracture repair techniques and achieving normal occlusion, a cornerstone of jaw fracture repair. To that point, pharyngostomy tube placement will also be discussed and demonstrated to facilitate appliance placement and maintain correct occlusion. Proper placement of wire and acrylic appliances on the mandible will be reviewed and practiced. Symphyseal wiring techniques will also be demonstrated and can be performed by the attendees. Standard equipment utilized for non-invasive jaw fracture repair will be discussed and will be available for use during the laboratory. Stabilization of caudal mandibular or TMJ fractures with maxillomandibular fixation will be demonstrated. Please note the majority of interdental wiring and acrylic placement will be performed on Sawbones™ mandibular models which attendees will be able to take home with them. A limited number of canine and feline cadaver heads will be available for demonstration and further practice. This laboratory would be ideal for those preparing for the AVDC examination or veterinarians with advanced dental training. **(DVMs ONLY)** Limited to 40 participants.

LABORATORIES AND SCHEDULE

CONTINUED...

Mandibular Fracture Repair Techniques - The lecture will cover techniques on how to repair symphyseal separation, unilateral mandibular body fracture, bilateral mandibular body fracture, coronoid fracture, condylar fracture, multiple fracture. The lecture and the lab to follow will concentrate on non-invasive techniques that preserve tooth roots. The lecture will also emphasize the importance of maintaining occlusion. The laboratory will then give a chance to the participant to apply some of the techniques covered in the lab. Actual fractures will have to be repaired using intraoral splints, interdental wires and intraosseous wires when indicated. **(DVMs ONLY)** Limited to 24 participants.

Oral Radiology for Technicians - This is a lecture and laboratory combination. The presentation includes description of equipment, indications for radiology, positioning and troubleshooting imperfect images. Conventional bisecting angle technique and other techniques are discussed in the lecture and explored in the presentation. Lab time is given to exposing images of all teeth in both canine and feline cadaver specimens. Special attention is given to techniques to examine imperfect images, evaluate what went wrong and ways to fix imperfect images. Limited to 24 participants.

Orthodontics II: Treatment of Linguoversion of the Mandibular Canine Teeth in the Cat and Dog – Veterinary orthodontics is not about creating a cosmetically perfect dentition, but about treating painful malocclusions to allow the animal to have a comfortable, functional bite. There will be a 50-minute lecture at the beginning of the lab to familiarize the attendee with the etiology and pathophysiology of this very painful condition. A review of the anatomy and classes of occlusion of the dog and cat will be provided. The materials and techniques will be thoroughly discussed to allow the attendee to maximize the remaining 3+ hours of lab time. Each attendee will have a dog (or cat) cadaver head and all of the materials needed to fabricate an acrylic bite plate with an inclined plane appliance. The appliance is intended to be durable and properly secured to the teeth in order to prevent inadvertent removal by the patient. Each attendee will learn the proper techniques to maintain the patient while the appliance is in place and to safely remove the appliance. **(DVMs ONLY)** Limited to 20 participants.

Periodontal Treatment II: Advanced Periodontal Therapy - This program will focus on periodontal therapy beyond the level of prophylaxis. Participants will learn the proper treatment approach for moderate to advanced periodontal disease. This course will cover proper methods for closed root debridement, open root debridement, application of regenerative agents, apically repositioned flaps, and laterally repositioned flaps. **(DVMs ONLY)** *Prerequisite lecture is Advanced Periodontal Therapy.* Limited to 30 participants.

Rabbit and Rodent Dentistry - This laboratory will cover oral anatomy, equipment, occlusal equilibration procedure, extraction of incisors, intraoral and extraoral cheek teeth extraction techniques. A lecture will precede the lab and give examples of the techniques to be covered later in the lab. **(DVMs ONLY)** Limited to 24 participants.

Regional Nerve Blocks for Technicians - This is a hands on wetlab covering specifics of regional nerve blocks for the dog and cat. Information covered will include technique for all appropriate regional blocks used in the dental practice, equipment required, agents and dosing used, as well as practical uses for this procedure. Periodontal therapy techniques for the veterinary technician will also be covered. This will include hand instrumentation, probing and charting, closed root planing, periosteal placement and gingival curettage. Periodontal disease processes and prevention will also be discussed. Limited to 24 participants.

Restorations Lab: Equipment, Materials, and Clinical Applications

- A one hour lecture presentation of recent updates, focusing on bonding agents and composite restorative materials and their application in veterinary dental practices. The lecture will be followed by a three hour hands-on laboratory where attendees will learn the proper indications for dentin bonding and composite restorations. Lesions will be created and restored and instructors will be available to offer their clinical insights as well as “tricks of the trade.” **(DVMs ONLY)** Limited to 30 participants.

Restorative Lab: Crown Preparation - Hands on laboratory covering Crown preparation, impressions and stone models. Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation and maintenance of the oral function, comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible substitutes. **(DVMs ONLY)** Limited to 30 participants.

Specialists in Training: Anesthesia - Refer to page 5 for more information. **(AVDC Trainees ONLY)** Limited to 40 participants.

Surgical Endodontics - This laboratory will teach the techniques of surgical endodontics. Topics will include: indications (and contraindications), equipment needs, and techniques for all major teeth. The hands on portion will cover the surgical approach (incision), trephination (bone removal), apicoectomy, root end preparation and filling, closure, and follow-up. The techniques will include a step by step performance for the four major teeth (maxillary and mandibular canines, the maxillary fourth premolar and the mandibular molars.) We will also discuss the various root end filling materials as well as their relative advantages and disadvantages. Finally, we will cover the recommended equipment, including ultrasonic reotips for maximum preservation of tooth structure. **(DVMs ONLY)** Limited to 30 participants.

Veterinary Dental Radiographic Technique Simplified - Veterinary dental radiography, in particular positioning is one of the most frustrating aspects of veterinary dentistry. The bisecting angle technique can be demanding and difficult to perform consistently. Positioning the patient, the sensor and the tube head to create quality images can be challenging. A simplified approach can consistently produce quality images with less confusion if a few principles are followed and some of the variables removed. Limited to 48 participants.

Vital Pulpotomy of Horse Incisors and Canines - This lab will allow participants to obtain hands on experience for the sterile preparation and application of vital pulpotomy in the horse incisors and canines. The lab will cover indications, instrumentation, medication, equipment and materials to complete a vital pulpotomy of a simple rooted tooth. **(DVMs ONLY)** *Prerequisite lecture is Vital Pulpotomy.* Limited to 12 participants.

Wildlife Dentistry - This lab will be hands on instruction in primate restorations, endodontics in large cats and beakistry. **(DVMs ONLY)** *Prerequisite lectures are Exotic Animal Dentistry and Large Cat Dentistry.* Limited to 30 participants.

2014 VDF PROGRAM GRID - FRIDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.
TICKETS ARE NO LONGER REQUIRED.

TIME	INTERNATIONAL 1	INTERNATIONAL 2	INTERNATIONAL 3	INTERNATIONAL 8-9	INTERNATIONAL 10
8:00-12:00pm	Introduction to Jaw Fracture Repair (K Taney) (DVM's ONLY)	Orthodontics II: Treatment of Lingually Displaced Mandibular Canine Teeth in the Cat and Dog (W Gengler, D Nossaman and C Miles) (DVM's ONLY)	Restorative Lab: Crown Preparations (R Furman and C Coffman) (DVM's ONLY)	Comprehensive Periodontal Debridement Techniques and Instrumentation for Treatment & Prevention of Periodontal Disease (C Weldin and R Brannan)	Canine Surgical Extractions Lab I (B Shope) (DVM's ONLY)
12:00-1:00pm	Lunch (pre-purchased lunches available with ticket in Exhibit Hall) **See schedule on page 1 for meetings held over the lunch hour.				
1:00-5:00pm		Mandibular Fracture Repair Techniques (L Legendre) (DVM's ONLY)	Endodontics I Endodontic Access (L Baker and C Schor) (DVM's ONLY)	1:00 - 6:00PM Endodontic/Prosthodontics Laboratory for Veterinary Technicians (D Carmichael)	Periodontal Treatment II Lab - Advanced Periodontal Therapy (D Beebe) (DVM's ONLY)

2014 VDF PROGRAM GRID - SATURDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.
TICKETS ARE NO LONGER REQUIRED.

TIME	INTERNATIONAL 2	INTERNATIONAL 3	INTERNATIONAL 7	INTERNATIONAL 8-9	INTERNATIONAL 10
8:00-12:00pm	Rabbit and Rodent Dentistry (L Legendre) (DVM's ONLY)	Endodontics II: Canal Cleaning, Shaping and Obturation (M Peak) (DVM's ONLY) <i>Pre-requisite Lecture: Introduction to Standard Root Canal Therapy</i>	Specialist in Training Lecture - Anesthesia (J Quandt and M Barletta) AVDC Trainees Only	Oral Radiology for Veterinary Technicians (J Moore)	Canine Extractions Lab II (D Kressin and S Honzelka) (DVM's ONLY)
12:00-1:00pm	Lunch (pre-purchased lunches available with ticket in Exhibit Hall) **See schedule on page 1 for meetings held over the lunch hour.				
1:00-5:00pm	Wildlife Dentistry (P Emily and S Holmstrom) (DVM's ONLY) <i>Pre-requisite Lectures: Exotic Animal Dentistry and Large Cat Dentistry</i>	Surgical Endodontics Lab (B Niemiec) (DVM's ONLY)	Specialist in Training Lab - Anesthesia (J Quandt and M Barletta) AVDC Trainees Only	Veterinary Dental Radiographic Technique Simplified (B Beckman)	Feline Extractions Lab (C Miles) (DVM's ONLY)

2013 VDF PROGRAM GRID - SUNDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.
TICKETS ARE NO LONGER REQUIRED.

TIME	INTERNATIONAL 1	INTERNATIONAL 2	INTERNATIONAL 3	INTERNATIONAL 9	INTERNATIONAL 10
8:00-12:00pm	Regional Nerve Block and Periodontal Therapy for Technicians (A Mills)	Vital Pulpotomy of Horse Incisors and Canines (C Niederman and J Reiswig) (DVM's ONLY)	Restorations: Equipment, Materials and Clinical Applications (M Peak) (DVM's ONLY)	Digital Intraoral Photography Lab (S Holmstrom)	Feline and Canine Extractions Lab (H Lobprise) (DVM's ONLY)
12:00-1:00pm	Lunch (pre-purchased lunches available with ticket in Exhibit Hall) **See schedule on page 1 for meetings held over the lunch hour.				
NO AFTERNOON LABS SCHEDULED.					

SurgiDENT™

WWW.SURGIDEN.COM

FULLY MOBILE WET-PREP LIFT STATIONS FOR SURGERY, DENTISTRY, OR BOTH!

The Theramax™ is the first hybrid solution to meet the challenges of both the surgical and dental needs in today's modern veterinary practice. With everything close at hand, working more efficiently and ergonomically translates directly to increased productivity.

THE THERAMAX ADVANTAGE

- NO FIXED PLUMBING REQUIRED
- CLEANS QUICKLY & EASILY
- TRUE MOBILITY & MULTI-FUNCTIONALITY
- FULLY INTEGRATED OPTIONS
- DESIGNED FOR CLINIC GROWTH

Theramax™

an evolution in clinical therapy

BOOTH # 208

NEW! scil DDX-R (Digital Dental X-Ray)

software is built on the latest platform to ensure a top quality product and longevity. The intuitive software is easy to use and contains all of the features you need to effectively implement Digital Dental X-Ray into your clinic today.

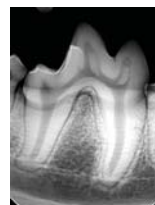

Digital CR Dental System: ScanX Duo offers workflow advantages by being able to scan all plate sizes: 0, 1, 2, 3, 4, 5 and 6. In addition, multiple processing slots allow two plates to be scanned simultaneously.

Outstanding Performance!

Full mouth series shot in under 5 minutes with exceptional image quality using our **Digital DR Dental with a USB sensor.**

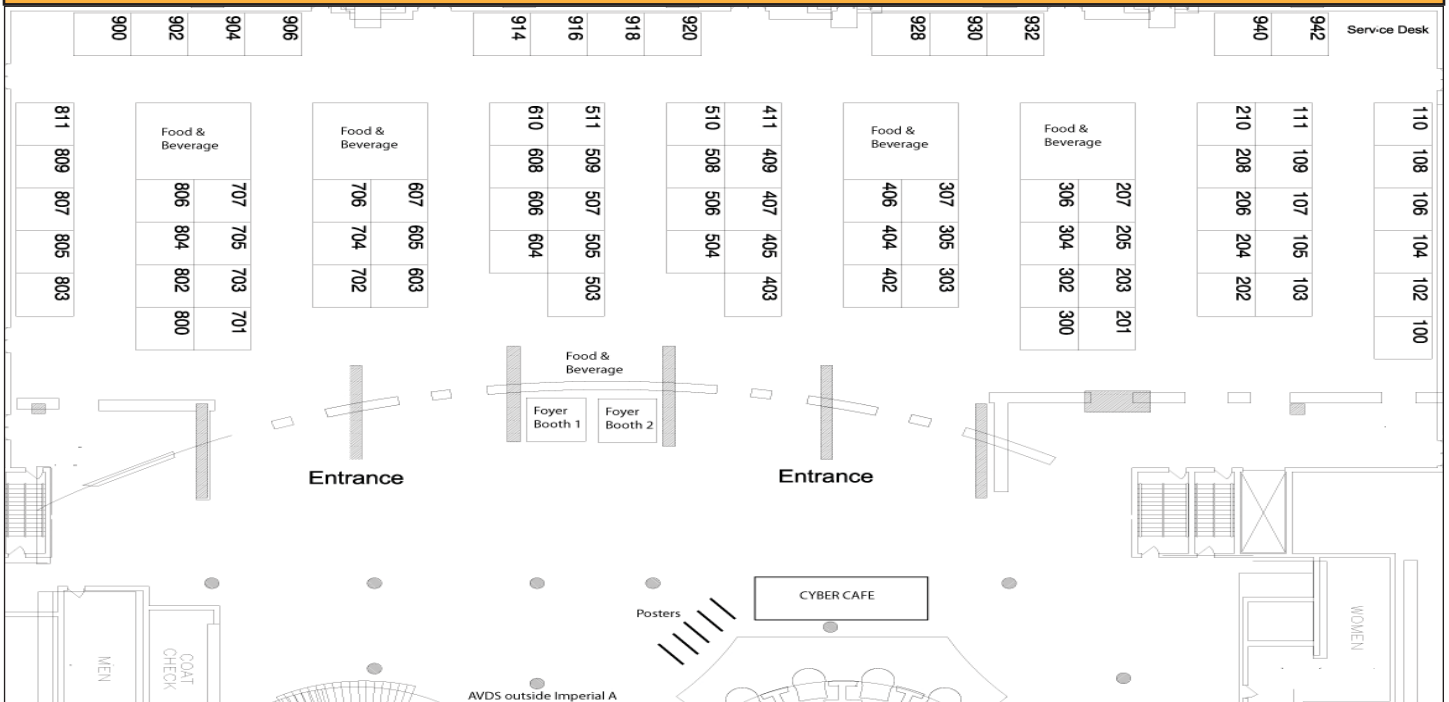

VENDOR PRODUCT & SERVICE CROSS-REFERENCE GUIDE

The VDF has provided the following vendor product referral guide to help you cross reference products with participating vendors. The products identified below were submitted by vendor companies. Vendor products are represented only if the vendor supplied the requested information to the VDF by August 1st or had previous records on file. Please see the complete vendor list, following this cross reference page, for a full list of participating vendors and their product descriptions. The VDF does not endorse any product or company by publishing this listing or other vendor information in this program.

3M is a global innovation company that never stops inventing. Over the years, our innovations have improved daily life for hundreds of millions of people all over the world. We have made driving at night easier, made buildings safer, and made consumer electronics lighter, less energy-intensive and less harmful to the environment. We even helped put a man on the moon. Every day at 3M, one idea always leads to the next, igniting momentum to make progress possible around the world. We also do the same for animals. 3M Animal Care continues to develop practical and ingenious solutions to meet our customer needs. We have been serving the animal health industry for more than 40 years, providing high quality products and services to veterinary professionals, trainers and pet owners in the companion animal and equine marketplace.

The American Veterinary Dental Society (AVDS) was founded in 1976 for the purpose of creating a forum – a forum for advancing the knowledge, education, and awareness of veterinary dentistry among veterinarians, students and the public. Through our efforts, we are successfully increasing awareness of the importance of this facet of animal medicine. The AVDS boasts a truly international membership with more than 1,100 U.S. members, over 70 Canadian members and over 60 international members. This makes

the AVDS the largest organization of veterinary dental professionals in the world. Membership in the AVDS is open to any veterinarian, dentist, hygienist, technician or individual with an interest in veterinary dentistry.

PO Box 454
Neshanic Station NJ 08853
908-336-8790 Phone
www.dentalfocus.biz
Dental Focus, LLC. Supplier of Veterinary Dental X-ray equipment and tables. X-Mind Unity Vet Dental X-ray with Sopix Digital Sensor Inside! The X-Mind Unity with Sopix Inside will activate and stop the generator, eliminating any risk of overexposure for both the image and your staff. The X-Mind Unity communicates with the ACE Technology present in the Sopix Inside. The generator analyzes in real time the amount of X-ray emission needed to enable perfect exposure of the image and therefore reduces staff exposure. Sopix is the ONLY digital sensor on the market that never overexposes with the highest detail available every time. The Sopix greatly reduces staff frustration by always producing an image with perfect exposure, which saves time and money by eliminating the need to take multiple shots.

Our unlimited support for all of our products is unmatched in the industry. With over 120,000 dental machines sold, our dental systems have withstood the test of time, stop by to see our new models or let us custom design a model specific to your needs. Newly designed surgical instrument packs serve all extraction or periodontal needs. We also carry endodontic, restorative and consumable product specific to the veterinarian dentist.

**The Complete Veterinary
Dental Home-Care Company**
Recipient of 9 VOHC® Seals for Plaque Control

News Flash

Visit Booth 304/306 to see our NEW Product Launch

Reach the Summit of Veterinary Dentistry with healthyMOUTH™

The ascent to a healthy mouth for all your dog and cat patients begins at base camp* (your practice) with professional veterinary assessment and dental care followed by YOUR mandatory, prescribed first level of home care after EVERY dental procedure (1)(2) healthyMOUTH™ plaque-retardant water additive, given to patients and their owners to start the climb.

The journey continues with daily use of healthyMOUTH plaque-retardant water additive until the next base camp is reached with continued professional care. The next prescribed level of home care (3)(4) healthyMOUTH topical gel, (5)(6) topical spray or (7) healthyMOUTH&mobility is sent home after the dental procedure as both patient and owner are more comfortable with the trek ahead.

The ascent continues. Your patients' mouths' continue to improve and your clients start understanding that investing in their pets' oral care was the best decision of their lives. Realistically, a guide is needed to reach a tough summit. We understand this and have assembled the best team of Diplomates worldwide, our version of the Mt. Everest Sherpas,*** to support you, the general practitioner, with any patients who may need more extensive care.

Until now, HM couldn't take your patients all the way to the summit (brushing). But now, HM has gone BEYOND the Gold Standard Summit. Our recent clinical trials demonstrated that while brushing alone is certainly of great value, brushing with HM gel (used as a toothpaste) in conjunction with a VOHC® accepted toothbrush produced maximum effectivity far beyond use of a toothbrush alone. As a result HM has earned two additional VOHC® Seals for plaque control for dogs for our (8)(9) healthyMOUTH™ gel toothpaste/ toothbrush kit: small/medium breed dogs & large dogs. You can purchase them NOW at the forum to carry in your practice.

And the descent – a life of continued professional and daily dental home care knowing the difference that you and your team have made in your patients' and owners' lives.

Is your practice ready to ascent to the top of the dental care world? If so, we invite you to stop by the HM Booths 304/306 to start gearing up.

Setting the new global standard for home dental care for Dogs and Cats

healthyMOUTH™ is part of a comprehensive dental care program used with professional veterinary dental care.

Meet the latest additions to the family and visit with HM poster-dog Ping-Pong, now 17 yrs young!

He's Back! Fraser, Hale (DVM, FAVD, DipAVDC), Notorious skeptic, scary VIN consultant, now HM Advocate. Visit our booths 304/306, to hear why Fraser himself was the first distributor of the patented, 100% human grade, free of artificial, synthetic ingredients, xylitol and alcohol free formula.

BOOTH #100
1051 Independence St
Lakewood CO 80215
303-355-7688 Phone
303-237-4122 Fax
The mission of PEIVDF is to provide advanced veterinary dental services for the benefit of captive exotic animals located in facilities in the US and abroad through an increase in the provision of advanced veterinary dental services and veterinary dental education. PEIVDF began conducting missions in October 2008, first as a private foundation, now as a public 501(c)(3) charity. In just under five years, our small charity has:

- Treated 196 animals at 16 sanctuaries during 38 missions: lions, tigers, leopards, cougars, jaguars, bears, wolves, hippos, chimpanzees, baboons, and ferrets, to name a few species
- Performed nearly 340 Root Canal Therapies, 171 unavoidable extractions, and 78 other procedures. This may seem like a lot of animals and a lot of procedures, but remember, there are more than 400 exotic animal sanctuaries and more than 200 zoos and aquariums in the US and Canada alone. That leaves a LOT of animals in need of dental work! Please help us continue our work by DONATING today!

VETERINARY INFORMATION NETWORK (VIN)

(SPONSOR)

CYBER CAFE

777 W Covell Blvd

Davis CA 95616

800-846-0028 Phone

Since 1991, VIN has been the number one online veterinary destination for veterinarians, by veterinarians. Those who don't "know" VIN, likely think VIN is a web site. But VIN members (VINners) quickly recognize that although VIN is a "site" on the "web", it is much more than a web site. VIN is a place. VIN is home to over 42,000 colleagues. Like many "sites on the web", VIN has lots of features - databases, message boards, conference rooms, online proceedings, and much more. And although those features are very useful and help busy veterinary professionals be the best clinicians they can be, providing those features is in no way what VIN is all about. Much more than the sum of its parts ("features"), VIN provides, for the first time in the history of our profession, what no other organization or service has been able to. Simply stated, VIN's greatest accomplishments are:

- Bringing together veterinarians "world-wide" as colleagues,
- Bringing instant access to vast amounts of up-to-date veterinary information to colleagues,

- Bringing instant access to "breaking news" that affects veterinarians, their patients and their practice,
- Bringing easy access to colleagues who have specialized knowledge and skills,
- Making CE - continuing education - available EVERY day,
- Empowering our profession.

NOTES

NOTES

NOTES

Want periodontal health? Use 1-TDC® for all cats and dogs.

Available from Major Distributors:

USED BY MAJOR VETERINARY
DENTAL CENTERS

“Based on a study I performed at the University of Saskatchewan, I was amazed at the positive result from the use of the 1-TDC® technology (1-TetraDecanol Complex). All periodontal measurements in the test animals improved significantly. The more I use the 1-TDC® technology, the more impressed I am.”

—**Dr. James Anthony,**
BSc(Agr), DVM, MRCVS, FAVD,
DAVDC, DEVDC, PAg

“1-TDC® technology has greatly improved both home care results and compliance. The most surprising result is the number of clients who report that their pet has increased mobility and comfort after the use of 1-TDC® technology for 3-6 weeks.”

—**Dr. Celeste Roy**
BS, DVM, DAVDC

“We send the product home in many of our periodontal cases.”

—**Jan Bellows**
DVM, Dipl. AVDC, ABVP

DISCLAIMER

This annual meeting is sponsored by the American Veterinary Dental College, the Academy of Veterinary Dentistry, and the American Veterinary Dental Society for educational purposes only. The material presented is not intended to represent the only or the best methods appropriate for the medical conditions being discussed, but rather is intended to present the opinions of the authors or presenters, which may be helpful to other healthcare professionals at arriving at their own conclusions and consequent applications. Attendees participating in this medical education program do so with full knowledge that they waive any claim they may have against the Veterinary Dental Forum for reliance on any information presented during these educational activities. The Veterinary Dental Forum does not guarantee, warrant or endorse any commercial products for services.
