A special ***“Thank You”*** to the sponsors of the  
29th Annual Veterinary Dental Forum!

**PREMIER SPONSOR**

**GOLD SPONSORS**

**SILVER SPONSORS**

**BRONZE SPONSORS**

**GENERAL SPONSORS**

## GENERAL INFORMATION

### ON-SITE REGISTRATION HOURS

#### THURSDAY

October 29

7:00am - 9:00am

1:00pm - 8:00pm

#### FRIDAY

October 30

7:00am - 6:00pm

#### SATURDAY

October 31

7:30am - 6:00pm

#### SUNDAY

November 1

7:30am - 4:00pm

### EXHIBIT HALL HOURS

#### THURSDAY

October 29

Exhibit Hall Grand Opening

6:00pm - 8:00pm

#### FRIDAY

October 30

9:00am - 6:00pm

#### SATURDAY

October 31

9:00am - 6:00pm

#### SUNDAY

November 1

9:00am - 2:00pm

#### REGISTRATION

Attendees will be required to sign in at the registration desk and in the lab rooms before participating.

#### LABORATORIES

Check your welcome letter for the list of labs for which you registered. Lab attendees' names will be on a sign in sheet in the lab room. Be sure to sign in! To register for an available lab on-site, visit the registration desk.

#### CONTINUING EDUCATION CREDITS

Attendees of the Veterinary Dental Forum can earn up to 29 hours of continuing education (CE). A certificate is provided in your attendee packet. Attendees must sign an attendance roster at registration for possible replacement of lost CE forms in the future.

#### NAME BADGES

Name badges will be required for participation in all sessions, workshops, laboratories and the exhibit hall. Badges are included in your conference materials received at the meeting registration desk and are only available for registered attendees and registered guests.

#### MORNING AND AFTERNOON BREAKS

An early morning coffee and tea station will be provided in the De Anza Foyer each morning prior to the start of presentations. Mid-morning and afternoon breaks with beverages will be provided in the Exhibit Hall. On Sunday, the afternoon break will be provided in the De Anza Foyer.

#### LUNCHES

This year, box lunches (on Friday and Saturday), are included with Forum registration. Attendees were asked to indicate whether they would like to receive a box lunch on the registration form. Lunch will be from 12:10pm-1:30pm to allow additional time to visit the exhibits. Lunch on Sunday is "on your own." Attendees will find many dining options within a five minute walk. Please see your attendee packet for a list of nearby options.

#### CANCELLATIONS AND REFUNDS

Cancellations and refunds are no longer permitted. A charge of \$50 will be assessed for each change made in laboratory selections.

#### PRINT STATION

To print notes from the proceedings USB, a print station will be located near the VDF Registration Desk for your convenience.

#### CYBER CAFÉ

The Veterinary Information Network (VIN) is once again sponsoring a Cyber Café which is located in the Portola Foyer.

#### 2014 CD

Limited 2014 VDF Atlanta Proceedings CDs will be available for purchase at the registration desk for \$15.

**NO VIDEOTAPING** is permitted in any sessions or labs.

**DOOR PRIZE WINNERS** will be posted on the memo board located near the exhibit hall.

**TICKETS\*** purchased for events can be found in your attendee packet.

*\*Tickets required for On the Cusp Breakfast/Lecture, Welcome Reception, Monterey Bay Aquarium Reception and Fun Run/Walk.*

# SPECIAL MEETINGS & EVENTS

CURRENT AS OF PRINTING ON 9/30/15

Consult a map of the meeting space on page 6 for room locations.

\* = Separate, pre-registration or ticket required.

## WEDNESDAY, OCTOBER 28, 2015

6:00pm-10:00pm BONSAI BALLROOM Review & Assessment\*  
Sponsored by Midmark.

## THURSDAY, OCTOBER 29, 2015

7:30am-8:30am DE ANZA II "On the Cusp" Breakfast\*  
If you registered for the Advanced lecture "On the Cusp," there will be a continental breakfast which will begin at 7:30am.

8:30am-10:30am DE ANZA II Advanced Lecture "On the Cusp"\*

10:45am-12:00pm DE ANZA II Awards Ceremony

12:00pm-4:30pm DE ANZA II Academy-College Joint Membership Meeting

2:00pm-4:30pm DE ANZA III AVDT Member Only Meeting

4:30pm-6:00pm DE ANZA II Combined Foundation & Society Meeting  
This meeting is open to all Forum registrants.

4:30pm-6:30pm DE ANZA I Annual Meeting for the AVDC Equine Specialty

5:00pm-6:00pm DE ANZA III AVDT Pinning Ceremony  
Sponsored by Hill's Pet Nutrition

6:00pm-8:00pm SERRA BALLROOM Exhibit Hall Grand Opening and Reception\*

## FRIDAY, OCTOBER 30, 2015

6:30am PORTOLA COURTYARD Fun Run/Walk\*  
Started in the '80s, the run/walk has been growing and improving ever since. This is an opportunity for attendees to take a break from the educational sessions and experience the beautiful path along Monterey Bay to the Monterey Bay Aquarium on historical Cannery Row and back. Participants can also win great prizes donated by our generous exhibitors! More information, including the route, is provided in participants' attendee packets.

12:10pm SERRA BALLROOM Box lunches available in Exhibit Hall for registered attendees and registered guests.

12:10pm-2:10pm PORTOLA ROOM Veterinary Dental Educators Meeting

12:30pm-1:30pm DE ANZA III AVDC Exam Q&A

12:30pm-1:30pm FERRANTE World Veterinary Dental Congress Delegates Meeting

3:20pm-3:50pm STEINBECK FOYER Posters Q&A Session

7:00pm-10:00pm MONTEREY BAY AQUARIUM Monterey Bay Aquarium Reception\*  
Busses will begin loading outside The Portola at 6:30pm. Tickets are required.

## SATURDAY, OCTOBER 31, 2015

7:00am-8:00am PORTOLA ROOM TSC Forum Meeting

7:15am-8:00am FERRANTE Advanced Standing, Credentialing, Training and Certifying Examination Information for the Equine Dental Specialty Meeting

9:50am-10:20am STEINBECK FOYER Posters Q&A Session

12:10pm SERRA BALLROOM Box lunches available in Exhibit Hall for registered attendees and registered guests.

5:40pm-6:40pm DE ANZA I AVDC Open Meeting of the Training Support

Committee (TSC) and AVDC (All AVDC Trainees, particularly those planning to submit a credentials application in 2016, are encouraged to attend.)

5:40pm-6:40pm BONSAI BALLROOM AVDT General Interest Information Meeting

7:00pm-10:00pm STEINBECK FORUM Specialists in Training Lecture

## SUNDAY, NOVEMBER 1, 2015

6:30am-8:00am BONSAI BALLROOM AVDT Mentees Meeting  
Light breakfast sponsored by Hill's Pet Nutrition.

7:00am-8:00am DE ANZA III AVD Trackers Information Meeting

## GUEST SPEAKERS

### Advanced Lecture “On the Cusp”

Thursday, October 29th

8:30am-10:30am

STEINBECK FORUM

*This is a ticketed event.*

#### Lessons Learned from Maxillomandibular Reconstruction in Humans

D. Gregory Farwell, MD, FACS

Professor and Vice Chair – Academic Affairs

Director, Head and Neck Oncology and Microvascular Surgery

Department of Otolaryngology – Head and Neck Surgery

University of California, Davis

Dr. Farwell's clinical practice has centered on the comprehensive management of head and neck malignancies including thyroid and parathyroid surgery. He has special interests in laser and robotic microsurgery of upper aerodigestive tract tumors and reconstructive surgery after traumatic and oncologic defects. His comprehensive approach to patient care allows the entire gamut of reconstructive surgery to be utilized to optimize his patient's functional and cosmetic results. He has worked extensively on improving patient functional outcomes with microvascular

organ replacement strategies and rehabilitation with coordinated speech and swallowing therapies available at UC Davis.

Dr. Farwell's research endeavors include multiple collaborations with the UC Davis Department of Biomedical Engineering working on noninvasive and minimally invasive technologies to diagnose neoplasms, novel and improved PET tracers, unique approaches to therapeutic drug delivery to neoplasms, and high-resolution imaging technologies. He is a collaborative investigator on two NIH/NCI funded projects focusing on Robotic Surgery Guidance. He also works closely with colleagues in the Department of Radiation Oncology to evaluate novel treatment strategies to minimize radiation side effects and maximize patient functional outcomes.

### Specialist in Training - Radiology

Lecture: Saturday, October 31st, 7:00pm-10:00pm, STEINBECK FORUM

Lab: Sunday, November 1st, 8:00am-11:00am, IRONWOOD II

*This lab attendance is limited to AVDC Trainees only and requires an additional registration fee.*

#### Imaging of the Temporomandibular Joint and Masticary Apparatus“, “Cone Beam CT in Veterinary Imaging” and “Imaging of Salivary Glands and Other Head Structures”

Tobias Schwarz, DMV, DECVDI, DACVR, DVR, MRCVS

European Veterinary Specialist in Diagnostic Imaging

Diagnostic Imaging Service Head Department of Veterinary Clinical Studies Royal (Dick) School of Veterinary Studies

The University of Edinburgh

Dr. Schwarz has authored/co-authored over 70 peer-reviewed veterinary papers as well as multiple book chapters and books. He is the Senior Lecturer in Diagnostic Imaging and Head of Department at the University of Edinburgh.

# HOTEL FLOOR PLANS

THE PORTOLA HOTEL AND MONTEREY CONFERENCE CENTER

## LEVEL ONE

- Exhibit Hall
- Registration Desk
- AVDT Member Meeting
- Fundamentals Session
- Intermediate Session
- Technician Session
- Marketing/Management
- Advanced (Sunday)
- Exotics (Sunday)
- Cyber Cafe

## LEVEL THREE

- Laboratories
- On the Cusp
- Awards Ceremony
- AVDC/AVD/AVDS Member Meetings
- Advanced Session (Friday/Saturday/Sunday)
- Exotics Session
- Equine Session
- Brief Clinical Reports
- Original Research
- Specialists in Training
- Posters

## Welcome to the 29th Annual Veterinary Dental Forum!

We are proud to once again be the Premier Sponsor of the  
Veterinary Dental Forum Wetlabs!

### Rely On Us for All Your Dental Equipment & Supplies

Select from top national brands or save without compromising on excellence, with our own high-quality Henry Schein Brand. We offer many solutions to meet the needs of all veterinary dental procedures. And, you can have absolute confidence they'll measure up to your standards, because they have already met our high standards to earn the Henry Schein Seal of Excellence.

#### Henry Schein Brand products offer:

- 100% guarantee of satisfaction
- Huge savings on the products and supplies you use most
- High quality and high value
- Broad selection – **more than 5,000 Henry Schein Brand products ... and growing**

Visit us at **Booth #303 & 402.**

10. Photographic Standardization in Orthodontia Veterinary (H Correa)
11. The Use of Expansion Screws for Orthodontics Procedures: Case Reports (H Correa)
12. Systemic Markers of Inflammation in Chronic Periodontal Disease in Dogs (J Kowalesky)
13. Rotated Flap to Correct Traumatic Cleft Palate by Electric Shock in a Dog (J Kowalesky)
14. Advancement Flap for Lip Reconstruction After Excision of Melanoma in a Dog (J Kowalesky)
15. Computer-aided Design and Manufacturing: For Developing Full Metal Titanium Crowns in Working Dogs (LA Mestrinho)
16. Genetic Study of Congenital Brachygnathia of Thoroughbred Horses (J Easley)
17. Successful Implementation of an Individualized Oral Treatment Healthcare Plan by Incorporation of Conscious Cleanings (K Knutson)
18. Impacted Tooth in a Slow Loris (*Nycticebus Javanicus*) (A Mateo)
19. Anyklosis and Psueudoankylosis of the Temporomandibular Joint in 10 Cases (1993-2015) (PC Stroem)
20. Embedded Tooth and Post-traumatic Pulpitis of Neighbouring Tooth in a Juvenile Dog (P Janalik)

**Sponsored by**

**C C O M P**  
Center for Comparative Oral and Maxillofacial Pathology  
at the University of Wisconsin-Madison  
School of Veterinary Medicine

*With generous contributions from:*  
Dr. Barden Greenfield  
Dr. Gary Modrcin  
Dr. Douglas Winter  
Dr. Bert Gaddis

*Awards will be presented to the top three poster presenters at the Awards Ceremony on Thursday, October 29th. Authors will be by their posters in the Steinbeck Foyer for Question & Answer Sessions during the afternoon break on Friday and the morning break on Saturday.*

# LABORATORIES AND SCHEDULE

SUBJECT TO CHANGE

*Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.*

## Canine Extraction Lab

Do you find extractions challenging? Learn the different approaches and techniques and how to improve your present extraction techniques in dogs. In the presentation preceding the lab, the instrumentation needed to do good work and different approaches to removing all roots of the teeth will be covered. This lab will help you on the road to successful extractions in your practice. **(DVMS ONLY) Limited to 20 participants.** This lab will be presented twice by different presenters. Check program schedule for times. **FRIDAY PM LAB IS FULL. SPACE AVAILABLE IN SATURDAY AM LAB.**

## Canine Radiography Lab

Veterinary dental radiography, in particular positioning, is one of the most frustrating aspects of veterinary dentistry. The bisecting angle technique can be demanding and difficult to perform consistently. Positioning the patient, the sensor and the tube can be challenging. A simplified approach can consistently produce quality images with less confusion if a few principles are followed and some of the variables removed. *Limited to 20 participants.* This lab will be presented twice by different presenters. Check program schedule for times. **SPACE AVAILABLE.**

## Comprehensive Periodontal Debridement Techniques & Instrumentation for Treatment & Prevention of Periodontal Disease

This entry-level lab covers comprehensive instrument selection, usage and care for treating periodontal disease. It includes use of ultrasonics and hand instruments (curettes/scalers); sharpening techniques; recognizing and charting oral pathology and polishing tips. Homecare, the mainstay of oral health, is included. This is a hands-on wet lab utilizing extracted teeth, skulls and cadavers and is designed for the veterinarian and technician as a fundamental tool for those who are beginning to incorporate dental cleanings in their practice. *Limited to 30 participants.* **SPACE AVAILABLE.**

## Dealing with Complications of Extractions (Retained Tooth Roots, Oronasal Fistulae, etc.)

Participants will have the opportunity to practice techniques for dealing with complications of surgical extractions in dogs and cats.

1. Demonstration and practice of techniques for efficient removal of fractured root tips. Participants will have the opportunity to use a wide variety of instrumentation including dental elevators, luxators, periosteal elevators, periostomes, luxating-type elevators with modified periostome tips. Instruments will be available that allow for atraumatic removal of root tips, including root tip elevators, root tip forceps and surgical-length burs.
2. Oronasal Fistula Repair. Closure of iatrogenic maxillary canine tooth oronasal fistulae will be discussed and practiced.
3. Iatrogenic rostral mandibular fracture repair. Discussion and practice of approaches toward iatrogenic rostral mandibular instability in cats.

Following this hands-on laboratory:

1. Participants will be able to perform root tip retrievals in dogs and cats atraumatically and efficiently.
2. Participants in this laboratory will become familiar with the proper use of a wide variety of hand and power instruments used to perform difficult root tip removals in dogs and cats.
3. Participants will be familiar with single flap oronasal fistula repair techniques.
4. Participants will be familiar with options for treatment of iatrogenic rostral mandibular fractures.

**(DVMS ONLY) Limited to 20 participants.** This lab will be presented twice by different presenters. Check program schedule for times. **THIS LAB IS FULL.**

## “Don’t Be Dull” Instrument Sharpening & Equipment Maintenance

Knowledge and skill of the veterinary professional are instrumental to the successful outcome of any dental procedure. A third and often overlooked

contributing factor to a successful procedure is the instrumentation and equipment used. Not only is the appropriate selection and correct use of dental instrumentation and equipment important, the care and maintenance they receive greatly impacts their effectiveness. Well maintained, sharp, dental hand instruments enable the veterinary professional to complete the procedure at hand more efficiently, with less trauma to the patient. Dental handpieces (both high and low speed) and dental machines that are properly cared for will prevent unnecessary, premature equipment failure and potential patient contamination. This lab will address sharpening materials needed, maintenance of stones, differences between luxators and elevators, how to size luxators and elevators, differences between scalers and curettes, how to sharpen (luxators, elevators, scalers, curettes, root tip picks, periosteal elevators, bone curettes, etc.), as well as how to do minor repairs on damaged and/or misshapen instruments. Participants will have an opportunity to practice sharpening techniques using stones as well as RX Honing machines. Handpiece and dental machine maintenance will also be addressed in this lab, including turbine care and replacement, compressor care, filter replacement, cleaning of dental lines, etc. *Limited to 30 participants.* This is a two hour lab. It will be presented twice. Check program schedule for times. **SPACE AVAILABLE.**

## Equine Dental Radiography Dry Lab

This will be a case based laboratory session. Cases from our practices will be presented with the radiographs and the audience will be asked to answer questions using a smart phone application that will quickly tabulate the answers (percentage choosing each answer). The initial question will be to choose a radiographic interpretation and differential diagnosis. Follow up questions will query the audience for their choice of other imaging modalities or additional radiographic views they think are needed for a definitive diagnosis and/or treatment planning. Then these additional images will be presented and the audience will be asked for their treatment recommendations. Finally, the actual treatment and outcome will be presented. The cases will start relatively simple and progress to more complex. Attendees will also be invited to pre-submit their own cases for possible inclusion in the laboratory session. **(DVMS ONLY) Limited to 20 participants. SPACE AVAILABLE.**

## Feline Extraction Lab

One hour of lecture prior to the lab to discuss indications for feline extractions and a step-by-step process of performing extraction of all teeth in the feline. The lecture will include common conditions that require extraction along with radiographs of the conditions to appropriately treat the condition. Attendees will get hands-on experience performing extractions in the feline mouth as well as some radiography to assist with diagnosis and treatment. **(DVMS ONLY) Limited to 20 participants.** This lab will be presented twice by different presenters. Check program schedule for times. **THIS LAB IS FULL.**

## Feline Radiography Lab

Our feline patients are unique in their anatomy, physiology and dental pathology. In order to properly diagnose oral disease, we need dental radiographs. The normal techniques used to radiograph dogs don't always work for cats. In this lab, we will improve and refine our dental radiograph techniques as they pertain to the feline patient. We will discuss and practice various techniques including extra-oral TMJ radiographs. We will work to overcome the unique challenges when radiographing cats, such as zygoma overlap and cutting off the root apices of the third mandibular pre-molars. We will work to improve the quality and timing of our dental radiograph series. There will be a lecture discussing interpretation of dental radiographs following the lab time. *Limited to 20 participants.* This is a two hour lab. It will be presented twice. Check program schedule for times. **SPACE AVAILABLE.**

# LABORATORIES AND SCHEDULE

CONTINUED...

## How to Really Read that Radiograph

Evaluating what lurks below the gum line paves the course of what needs to be done to help our patients. This presentation will look deeply into intraoral radiology interpretation with focus on periodontal, endodontic, tooth resorption and neoplastic disease in clinical cases. *Limited to 20 participants.* This is a two hour lab. It will be presented twice. Check program schedule for times. **THIS LAB IS FULL.**

## Minimally Invasive Maxillary Fracture Repair Techniques

This lab is designed to help the participant deal with fractures of the maxilla, to decide whether or not to reduce the fracture, and to devise techniques that avoid the use of pins, plates and screws. The participant will be presented with actual fractures and will have to formulate a plan before correcting the damage. A list of equipment will also be supplied to help people new to this field. Participants should attend the lecture in the Intermediate Session on Friday at 9:00am before attending this lab. **(FULL/PART-TIME RESIDENTS ONLY)** *Limited to 20 participants.* **SPACE AVAILABLE.**

## Oral Surgery Lab: Rostral Maxillectomy and Mandibulectomy

Hands on laboratory focusing on indications for maxillectomies and mandibulectomies, including determining and obtaining surgical margins of tumors located in the rostral maxilla and mandible in the canine patient. Instrumentation, proper surgical technique, obtaining tension-free closure and avoidance of complications will be discussed as well. **(FULL/PART-TIME RESIDENTS ONLY)** *Limited to 20 participants.* **SPACE AVAILABLE.**

## Orthodontics: Treatment of Linguoversion of Mandibular Canine Teeth

This lab will give the attendee the ability to diagnose and treat a very common malocclusion: Linguoversion of the mandibular canine teeth. The participant will have hands-on use and application of the most recently developed materials to effectively treat this common bite abnormality by direct fabrication of crown extensions and bite plate with an includes plane. A lecture at the beginning of the lab will teach attendees how to conduct a thorough bite evaluation, instruction on the classes of malocclusions and the pathology involved along with familiarizing attendees with the materials and orthodontic concepts. **(FULL/PART-TIME RESIDENTS ONLY)** *Limited to 30 participants.* **SPACE AVAILABLE.**

## Periodontal Flap Surgery

This lab will initiate discussion of various indications (and contraindications) for periodontal flaps in veterinary patients. The necessary armaturium for periodontal surgery will be presented. The bulk of this lecture will be dedicated to proper techniques and tissue handling for creating periodontal flaps (both full and envelope). We will demonstrate special flaps for certain situations such as semilunar flap for increasing attached gingiva, lateral sliding flap for cleft defects, and apical repositioning flaps for crown lengthening and pocket reductions. Following the introductory lecture, attendees will perform a full and envelope flap for various teeth which are commonly treated. Finally, attendees will learn and practice proper flaps for increasing attached gingiva (semi-lunar and lateral sliding flaps) as well as to decrease pocket depth (apical repositioning flap). Participants should attend the lecture in the Intermediate Session on Friday at 8:00am before attending this lab. **(FULL/PART-TIME RESIDENTS ONLY)** *Limited to 20 participants.* **SPACE AVAILABLE.**

## Periodontology for the Technician

This wet lab will cover the basics of providing periodontal therapy for the veterinary technician, this lab will utilize dental delivery units and hand instrumentation as well as perioceuticals to provide therapeutic dental treatment experience. *Limited to 30 participants.* This is a two hour lab. It will be presented twice. Check program schedule for times. **SPACE AVAILABLE.**

## Professional Dental Charting for the Technician

This wet lab will cover the basics of oral anatomy, charting the periodontal tissues and tooth structures utilizing the AVDC abbreviations to document all findings to create a complete dental chart for both canine and feline specimens. *Limited to 30 attendees.* This is a two hour lab. It will be presented twice. Check program schedule for times. **SPACE AVAILABLE.**

## Regional Nerve Blocks for Technicians

In this quick two-hour lab, we will discuss the benefits of performing regional nerve blocks, the types of agents available, their actions, dosages, combinations, as well as possible complications and how to avoid them. We will go over the various techniques, equipment and practice the maxillary, infraorbital, mandibular, middle mental and palatal nerve blocks on dog and cat cadavers. *Limited to 20 participants.* This is a two hour lab. It will be presented twice. Check program schedule for times. **THIS LAB IS FULL.**

## Restorative Lab: Crown Preparation

Hands on laboratory covering Crown preparation, impressions and stone models. Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation and maintenance of the oral function, comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible substitutes. **(FULL/PART-TIME RESIDENTS ONLY)** *Limited to 20 participants.* **SPACE AVAILABLE.**

## Specialists in Training: Radiology

Refer to SIT information on page 5. **(AVDC Trainees ONLY)** *Limited to 30 participants.* **THIS LAB IS FULL.**

## The Technician's Role in Endodontic and Prosthodontic Procedures

Endodontics Learning Objectives:

- Recognize clinical presentations of endodontic pathology.
- Interpret diagnostic tests relevant to endodontic disease.
- Understand the equipment needs and procedures for vital pulp therapy.
- Understand the equipment needs and procedures for conventional root canal therapy.
- Understand the equipment needs and procedures for surgical root canal therapy.

Prosthodontics Learning Objectives:

- Understand the principles of prosthodontics
  - Understand the equipment needs for tooth preparation
  - Understand the equipment needs and procedure for impression taking
  - Understand the equipment needs and procedure for crown placement
- (AVDT Mentees ONLY)**
- Limited to 20 participants.*
- SPACE AVAILABLE.**

## Zoo/Captive Wild Animal Dentistry

This lab will cover a variety of subjects in zoo/captive wild animal dentistry. For the first time, we will be including intraoral radiology using the skulls for captive wildlife most often encountered in exotic animal dentistry - lions, leopards, sea lions, bears, etc. Endodontics will be covered using plastic models to simulate filing and obturating lion and tiger canine teeth. Extracted and sterilized human teeth will be used to perform endodontics and cavity preparation using tofflemire matrix band restorations. The treatment of fractured abnormal teeth using mini-pins wire and Protemp Garant (R) will also be covered. **(DVMS ONLY)** *Limited to 20 participants.* **SPACE AVAILABLE.**

## 2015 VDF PROGRAM GRID - FRIDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	REDWOOD	IRONWOOD I	IRONWOOD II	COTTONWOOD I	COTTONWOOD II
8:00-10:00am	Feline Extraction Lab (J Huff) <b>DVMs ONLY</b>	Restorative Lab Crown Preparations (R Furman) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b>	Orthodontics Lab: Treatment of Linguoverision of Mandibular Canine Teeth (B Gengler) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b>	Professional Dental Charting for the Technician (B Altier)	Comprehensive Periodontal Debridement Techniques & Instrumentation for Treatment & Prevention of Periodontal Disease (R Brannan and C Weldin)
10:00am-12:00pm				Periodontology for the Technician (B Altier)	
12:00-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each) **See schedule on page 1 for meetings held over the lunch hour.				
1:30-3:30pm	Canine Extraction Lab (J Banyard) <b>DVMs ONLY</b>	Minimally Invasive Maxillary Fracture Repair Techniques (L Legendre) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b> Prerequisite Lecture: Minimally Invasive Maxillary Fracture Repair Techniques, Friday, 9:00am	Periodontal Flap Surgery (B Niemiec) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b> Prerequisite Lecture: Periodontal Flap Surgery, Friday, 8:00am	Equine Radiology Lab (R Barratt and L Limone) <b>DVMs ONLY</b>	Regional Nerve Block for Dental Patients (P March)
3:30-5:30pm					Regional Nerve Block for Dental Patients (P March) <i>repeated</i>

## 2015 VDF PROGRAM GRID - SATURDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	REDWOOD	IRONWOOD I	IRONWOOD II	COTTONWOOD 1	COTTONWOOD II
8:00-10:00am	Canine Extraction Lab (D Kressin) <b>DVMs ONLY</b> <i>repeated</i>	Dealing with Complications of Extractions (Root tip removal, oronasal fistula repair, etc.) (J Lewis, M Jennings and K Walker) <b>DVMs ONLY</b>	Oral Surgery Lab Rostral Maxillectomy and Mandibulectomy (R Furman) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b>	Feline Radiography Lab (P March)	Canine Radiography Lab (B Gaddis)
10:00am-12:00pm				How to Really Read that Radiograph (J Bellows and E McMorran)	
12:00-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each) **See schedule on page 1 for meetings held over the lunch hour.				
1:30-3:30pm	Feline Extraction Lab (C Miles) <b>DVMs ONLY</b> <i>repeated</i>	Dealing with Complications of Extractions (Root tip removal, oronasal fistula repair, etc.) (C Snyder and L Klima) <b>DVMs ONLY</b> <i>repeated</i>	Zoo/Captive Wildlife Lab (D Winter, P Emily, S Holmstrom and T Brandon) <b>DVMs ONLY</b>	Canine Radiography Lab (G Modrcin) <i>repeated</i>	Feline Radiography Lab (P March) <i>repeated</i>
3:30-5:30pm					How to Really Read that Radiograph (J Bellows and E McMorran) <i>repeated</i>

## 2015 VDF PROGRAM GRID - SUNDAY LABS

PRE-REGISTERED ATTENDEES ARE REQUIRED TO SIGN IN AT ROOM TO ENTER LABS.

TIME	REDWOOD	IRONWOOD I	IRONWOOD II	COTTONWOOD	
8:00-10:00am	"Don't Be Dull" Instrument Sharpening & Equipment Maintenance (T Evans) <i>repeated</i>	Professional Dental Charting for the Technician (B Altier) <i>repeated</i>	8:00-11:00 Specialist in Training - Radiology (T Schwarz) <b>Full and Part-time Residents only (Part-time = Alt Pathways Candidates)</b>	The Technician's Role in Endodontic and Prosthodontic Procedures (B Hall) <b>AVDT Mentees ONLY</b>	
10:00am-12:00pm		Periodontology for the Technician (B Altier) <i>repeated</i>			
12:00-1:30pm	Lunch on your own. Exhibits close at 2:00pm. **See schedule on page 1 for meetings held over the lunch hour.				

**NO AFTERNOON LABS SCHEDULED.**

Same Great PlaqueOff® Product

# ProDen PlaqueOff® Animal

Now in two easy ways!

*Simply Sprinkle on Food!*

ProDen SUPPORTS NORMAL AND HEALTHY TEETH, GUMS AND BREATH ODOR.

## PlaqueOff® Dental Bites

- Easy to use - A sprinkle a day or a crunchy treat!
- Great for both Cats and Dogs
- Highly Palatable
- Always working
- Human Grade
- Award Winning
- Vet Recommended
- Unconditional Guarantee

✓ **Bad Breath**  
✓ **Plaque**  
✓ **Tartar**

**NO**

Alcohol  
Anti-Bacterials  
Zinc  
Xylitol

Wheat or Gluten  
Soy  
Artificial Additives  
Enzymes

Guaranteed to improve bad breath and reduce or soften plaque and tartar in 2-8 weeks\*.

## AN INNOVATION IN ORAL HEALTH CARE!

\*Average time frame from US study. Results may vary.

The Global Leader in Veterinary Dental Home-Care

He's Back!  
Fraser Hale, (DVM,  
FAVD, DipAVDC),  
notorious skeptic,  
scary VIN  
consultant, now  
HM Distributor/  
Ontario/Quebec and HM  
Product Advocate. Visit our  
booths 207/209, to learn —  
how did this happen?

Ontario/Quebec and HM  
Product Advocate. Visit our  
booths 207/209, to learn —  
how did this happen?

**Does your own dentist make daily home dental care optional for you?**

Just like you, EVERYONE of your dog and cat patients needs  
home dental care after professional cleaning.

**12 Water Additives**

**Topical Gels**

**Topical Sprays**

**Mouth & Mobility**

**Toothpaste Gels/Toothbrush Kits**

**Twenty-Nine Products, 29 VOHC® Seals for Plaque Control**

Setting The Standard in Home Dental-Care for Dogs and Cats Worldwide

They're back too!  
Our 4 "poster" puppies to  
show you what optimum  
dental care is (even at age 2),  
thanks to their great veterinary  
dentist, Dr. Beckman (DVM,  
FAVD, DAVDC, DAAPM) and  
healthymouth-at-home.

**So where in the world is healthymouth™?**

**NOW MANUFACTURED IN:**

- North America
- Europe
- Central America
- Asia
- South America
- Australia

**And where should you be?**

**Learning more at our Booths 207/209**

The team, (humans and pets) look forward to  
showing you why "healthymouth stands alone™."

# VENDOR PRODUCT & SERVICE CROSS-REFERENCE GUIDE

The VDF has provided the following vendor product referral guide to help you cross reference products with participating vendors. The products identified below were submitted by vendor companies. Vendor products are represented only if the vendor supplied the requested information to the VDF by August 1st or had previous records on file. Please see the complete vendor list, following this cross reference page, for a full list of participating vendors and their product descriptions. The VDF does not endorse any product or company by publishing this listing or other vendor information in this program.

# EXHIBITORS AND BOOTH NUMBERS

## **3M ANIMAL CARE**

BOOTH #107

3M Center Bldg 223-5N-03

St Paul MN 55144

800-848-0829 Phone

651-733-9151 Fax

[www.3m.com/animalcare](http://www.3m.com/animalcare)

3M is a global innovation company that never stops inventing. Over the years, our innovations have improved daily life for hundreds of millions of people all over the world. We have made driving at night easier, made buildings safer, and made consumer electronics lighter, less energy-intensive and less harmful to the environment. We even helped put a man on the moon. Every day at 3M, one idea always leads to the next, igniting momentum to make progress possible around the world. We also do the same for animals. 3M Animal Care continues to develop practical and ingenious solutions to meet our customer needs. We have been serving the animal health industry for more than 40 years, providing high quality products and services to veterinary professionals, trainers and pet owners in the companion animal and equine marketplace.

## **DENTAL FOCUS LLC (SPONSOR)**

BOOTH #221

PO Box 454  
Neshanic Station NJ 08853  
903-336-8790 Phone  
www.dentalfocus.biz

Supplier of Veterinary Dental X-ray equipment and tables. X-Mind Unity Vet Dental X-ray with Sopix Digital Sensor Inside! The X-Mind Unity with Sopix Inside will activate and stop the generator, eliminating any risk of overexposure for both the image and your staff. The X-Mind Unity communicates with the ACE Technology present in the Sopix Inside. The generator analyzes in real time the amount of X-ray emission needed to enable perfect exposure of the image and therefore reduces staff exposure. Sopix is the ONLY digital sensor on the market that never overexposes with the highest detail available every time. The Sopix greatly reduces staff frustration by always producing an image with perfect exposure, which saves time and money by eliminating the need to take multiple shots.

## **PETER EMILY INTERNATIONAL VETERINARY DENTAL FOUNDATION (PEIVDF)**

BOOTH #113

1051 Independence St  
Lakewood CO 80215  
303-355-7688 Phone  
303-237-4122 Fax

www.peteremilyfoundation.org  
The mission of PEIVDF is to provide advanced veterinary dental services for the

benefit of captive exotic animals located in facilities in the US and abroad through an increase in the provision of advanced veterinary dental services and veterinary dental education. PEIVDF began conducting missions in October 2008, first as a private foundation, now as a public 501(c)(3) charity. In just under seven years, our small charity has:

- Treated 296 animals at 17 sanctuaries during 49 missions: lions, tigers, leopards, cougars, jaguars, bears, wolves, hippos, chimpanzees, baboons, and ferrets, to name a few species.
- Performed nearly 405 Root Canal Therapies, 219 unavoidable extractions, and 169 other procedures. This may seem like a lot of animals and a lot of procedures, but remember, there are more than 600 exotic animal sanctuaries and more than 200 zoos and aquariums in the US and Canada alone. That leaves a LOT of animals in need of dental work! Please help us continue our work by DONATING today!

www.petdnalabs.com

K9 Smiles™ from PetDNA Labs PetDNA Labs, a division of Access Genetics, offers the powerful K9 Smiles test for 3 pathogenic forms of oral bacteria known to cause periodontal disease and systemic illness. A simple oral swab is all that is needed for our PCR molecular technology to detect and quantify each of these harmful bacteria types. Together with a physical examination, a clear picture can emerge of when and how aggressively to treat. Repeat tests can be used to evaluate effectiveness of treatment. The MSRP is \$69 (discounted to vets) and the report is ready in about 3 days. It is covered by most pet insurance plans.

[www.petsmileusa.com](http://www.petsmileusa.com)

Invented by the makers of Supersmile, Petsmile is the first pet toothpaste recommended by the Veterinarian Oral Health Council (VOHC) to be awarded the VOHC seal for plaque inhibition. Petsmile's exclusive Calprox® formula is clinically proven to safely inhibit plaque formation for healthier teeth and gums, while keeping your pets breath fresh. Best of all, Petsmile allows owners and vets to avoid the difficulty of having to brush their pets teeth. Petsmile can be easily applied with our unique Applicator Swabs, that have a reusable latex tip. It is ideal for all breeds and sizes of dogs, cats, and a variety of other pets. Petsmile has a natural London Broil flavor that pets love. Petsmile showed significant plaque improvement in three independent clinical studies required by the VOHC. In every case, dogs showed improved oral hygiene. Petsmile also proved to be over 28% more effective in reducing gingivitis than other pet toothpastes. Customers applaud Petsmile saying, "My dog loves it, and the vet always comments on how great her teeth look. I've tried all toothpastes at the pet store, and Petsmile is by far the best out there. You see results quick!" Vet recommended. Pet Approved.

Poor or inadequate saliva is the original

hidden cause of bad breath, periodontal disease and tooth loss. Oratene® Veterinarian Brushless Oral Care (formerly Biotene®) utilizes 30+ years of Dry Mouth enzyme technology and contains two complete, natural multi-complex enzyme systems that dissolve plaque biofilm and inhibit odor-causing bacteria to help balance oral flora and restore saliva's protective abilities. Especially beneficial for pets suffering from chronic illness, on medication or seniors.

# No. 1 Periodontal Health Protocol

80% of your patients need 1-TDC®!

"Based on a study I performed at the University of Saskatchewan I was amazed at the positive result from the use of the 1-TDC® technology (1-TetraDecanol Complex Fatty Acids). All periodontal measurements in the test animals improved significantly. The more I use the 1-TDC® technology the more impressed I am. It is not the total answer to oral health but it is a tremendous aid."

— Dr. James Anthony, BSc(Agr), DVM, MRCVS, FAVD, DAVDC, DEVDC, PAg

"We send the product home in many of our periodontal cases."

— Jan Bellows, DVM, Dipl. AVDC, ABVP
