GENERAL INFORMATION

ON-SITE REGISTRATION HOURS

THURSDAY
October 21
8:00am - 8:00pm

FRIDAY
October 22
7:00am - 5:30pm

SATURDAY
October 23
7:00am - 5:00pm

SUNDAY
October 24
7:00am - 3:00pm

EXHIBIT HALL HOURS

THURSDAY
October 21
Exhibit Hall Grand Opening
6:00pm - 8:00pm

FRIDAY
October 22
9:00am - 6:00pm

SATURDAY
October 23
9:00am - 6:00pm

SUNDAY
October 24
9:00am - 2:00pm

WELCOME RECEPTION - Join us on Thursday evening from 6:00pm-8:00pm for appetizers and drinks in the Griffin Exhibit Hall. This is an opportunity for you to catch up with colleagues before the conference gets underway. You will need to either wear your badge or bring your welcome reception guest ticket with you to this event.

HEALTH & SAFETY GUIDE- The Veterinary Dental Forum strongly encourages all attendees to be vaccinated prior to the conference. **Masks will be required to be worn during the Veterinary Dental Forum (for those with medical conditions that prohibit them from wearing a mask, please see the registration desk).**

LABORATORIES

Check your welcome letter for the labs for which you are registered. Attendees' names will be on a sign in sheet in the each room. Be sure to sign in! All labs are located on the lower level, see page 7. To register for an available lab on-site, visit the registration desk.

CONTINUING EDUCATION CREDITS

Attendees of the Veterinary Dental Forum can earn up to 24 hours of continuing education (CE). A certificate is provided in your attendee packet. Attendees must sign an attendance roster at registration for possible replacement of lost CE forms in the future.

WEAR YOUR NAME BADGE - REQUIRED FOR ACCESS - Always wear your name badge to attend any VDF event. It is your ticket into the conference lectures, exhibitor hall and laboratories. If you purchased a guest ticket(s) for the Welcome Reception, your ticket can be found in your registration packet. You will need either a ticket or your badge in order to gain admission to this event.

MEETING SPACE - WIFI is available to all attendees through sponsors Dechra Veterinary Products and VDF.

Network: JWMarriott_CONFERENCE
Password: DECHRA

MORNING AND AFTERNOON BREAKS

Mid-morning and afternoon breaks with beverages will be provided in the exhibit hall.

LUNCHESES

Box lunches (on Friday and Saturday), are included with Forum registration. Attendees were asked to indicate whether they would like to receive a box lunch on their registration form, this will be indicated on your welcome letter. Lunch will be from 12:10pm-1:30pm to allow additional time to visit the exhibits. Lunch on Sunday is "on your own." Attendees will find dining options within the JW Marriott IndyPlace.

CANCELLATIONS AND REFUNDS

On-site cancellations and refunds are no longer permitted. A charge of \$50 will be assessed for each change made in laboratory selections.

NO VIDEOTAPING OR PHOTOGRAPHY is permitted in any session or lab.

FUN RUN & WALK - The VDF Fun Run will begin at 6:30am on Saturday. Plan to meet your fellow runners at 6:15am in the JW Marriott Hotel Lobby for a casual start. Light refreshments will be available in the lobby after the event. Maps will be available at the registration desk if needed; please note that the registration desk will not be open during the Fun Run on Saturday. You may pick up your shirts anytime Friday or Saturday at the main registration desk. Pre-registration is required to receive a shirt. If you are not registered, you may run with the group at no cost but t-shirts will not be available. This event is being co-sponsored by: RevBio, Inc. and TriLogic Pharma.

A special **“Thank You”** to the sponsors of the

Specialist in Training - Speaker

Specialist in Training - Anesthesia

Lectures: Sunday, October 24th, 1:30pm - 5:40pm, First Floor, White River Ballroom F

Dianna Ovbey, DVM, MS, DACVAA

As an experienced board-certified veterinary anesthesiologist, Dr. Ovbey has provided care in both academic and private practice settings on both small and large animals. She has worked in conjunction with specialists in nearly every field including surgery, dentistry, radiation oncology, internal medicine, and emergency/critical care. Because of her credentials and exclusive focus on the [safe administration of anesthesia and appropriate pain management](#), Dr. Ovbey is uniquely qualified to provide the most advanced care from examination to induction, through to recovery and restoration of quality of life.

Prior to launching SEVAS, Dr. Ovbey worked in private practice in Western Pennsylvania where she started the anesthesiology and pain management department, expanding the quality and depth of care for a wide range of patients. She also created a comprehensive technician and DVM anesthesia training program that was part of the curriculum at the hospital, further enhancing the care of every patient.

Dr. Ovbey received her formal veterinary training at the following institutions:

DVM: Ross University, Clinical Year: Texas A&M University

Medicine and Surgery Internship: University of Georgia

Master of Science: Michigan State University

Anesthesia Residency: Michigan State University

Specialist in Training Lectures Sponsored by:

TIME	LECTURE TITLES	SPEAKER
1:30pm-2:20pm	Premedications Every Dentist Should Consider	Dr. Dianna Ovbey
2:30pm-3:20pm	Induction Agents Useful for the Dental Practice	Dr. Dianna Ovbey
3:20pm-3:50pm	<i>Break - Griffin Hall Foyer</i>	
3:50pm-4:40pm	Pain Physiology and Management for Dentistry	Dr. Dianna Ovbey
4:50pm-5:40pm	Anesthesia Complications in Dentistry, When Should I Call for Help?	Dr. Dianna Ovbey

***Residents needing their specialty hours must sign into the Specialist in Training lectures on the sign-in form that will be located on a table inside the back of the room. SIT certificates will be emailed directly after the conference to those that signed up.**

***No certificate can be rendered if you did NOT sign the form.**

REVBIO

ANIMAL HEALTH™

TRANSFORMING BONE REPAIR™

RevBio Animal Health was started with one goal in mind—to end veterinary medicine’s fifty year search for a biocompatible bone adhesive. Effective for bone-to-bone in the wet field applications, Tetranite Vet® is a revolutionary biomaterial that promises to transform bone repair for both patients and clinicians.

TETRANITE® VET
THE PATENTED BONE ADHESIVE
THAT IS TRANSFORMING BONE REPAIR

Tetranite Vet demonstrates superior maintenance of mandibular bone volume over the current standard of care—blood clot.

**REGISTER FOR FREE TETRANITE VET
PRODUCT TRAINING:**

SUNTEK
VETERINARY

On The SUNTEK Surgical Headlight!

"I have been practicing veterinary medicine for twenty one years. I have evaluated other surgical headlamps, only to be disappointed in their quality, weight and output. The SunTek veterinary headlight is quiet, lightweight, comfortable, and delivers a bright, well-focused light. I use this headlight for dental surgeries, tumor removals, spays/neuters and other procedures. It really makes a difference! I highly recommend the SunTek surgical headlight. For me, it is the answer I have been searching for."

3:20pm-3:50pm	Break with Exhibitors - Griffin Hall	
3:50pm-4:40pm	Biopsy of Lymph Nodes in Oral and Maxillofacial Oncology	A. Reiter
4:50pm-5:40pm	Advanced Care of the Traumatized Tooth	J. Bellows

2021 VDF PROGRAM GRID - FRIDAY LECTURES

Program subject to change (for current schedule, refer to VDF website; www.VeterinaryDentalForum.org)

****See schedule on page 4 for meetings held over the lunch hour.**

ORIGINAL RESEARCH

White River Ballroom E

TIME	PRESENTATION
8:00am-8:50am	Welcome Remarks 1. Localization of the First Mandibular Molar Roots in Relationship to the Mandibular Canal in Small Breed Dogs (H. Chia) 2. Biomechanical Testing of a Calcium Phosphate-Phosphoserine-Based-Mineral-Organic Adhesive for Non-Invasive Fracture Repair of Mandibular Fractures in Dogs (A. Geddes)
9:00am-9:50am	3. Canine Oral Bacterial Signatures and Microbiota Modulation via Dental Chews (A. Ruparell) 4. Bacterial Signatures of Periodontal Disease are Conserved Across Geographies (C. Wallis)
9:50am-10:20am	Break with Exhibitors - Griffin Hall
10:20am-11:10am	1. Use of Unbiased Metagenomic and Transcriptomic Analyses to Investigate the Association Between Feline Calicivirus and Feline Chronic Gingivostomatitis in Domestic Cats (M. Soltero-Rivera) 2. In Vivo and in Vitro Models of Canine Oral Squamous Cell Carcinoma (S. Peralta)
11:20am-12:10pm	3. Effect of Alternative Palatal Root Access Technique on Fracture Resistance of Root Canal Treated Maxillary Fourth Premolar Teeth in Dogs (J. Matelski) 4. Mineral-Organic Bioresorbable Bone Adhesive's Ridge Maintenance Over Time (G. Kay)
12:10pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)
1:30pm-2:20pm	1. Retrospective Study Comparing Full Metal Crown Restoration Failure Rates of an Adhesive and a Self-Adhesive Resin Cement (K. Linder) 2. The Macroscopic and Radiographic Skull and Dental Pathology of the Tasmanian Devil (<i>Sarcophilus harrisii</i>) (S. Landy) 3. Clinical Findings in Roman Dog Skulls (G. Morgenegg)
2:30pm-3:20pm	1. Brief Clinical Report (25min): Medical Management of Dental Abnormalities Associated with Feline Congenital Hypothyroidism (J. Bates) 2. Brief Clinical Report (25min): Comparison of Cone Beam Computed Tomography, Digital Radiography and Oral Exam in the Identification of Feline Tooth Resorption with Histopathologic Analysis as the Gold Standard (D. Clayton)
3:20pm-3:50pm	Break with Exhibitors - Griffin Hall
3:50pm-4:40pm	1. Brief Clinical Report (25min): CAD/CAM and Additive Manufacturing of a Prosthetic Crown on a Walrus (Y. Dumais) 2. Brief Clinical Report (25min): Retrospective Study of the Success Rate of Titanium CAD/CAM Crowns on the Maxillary Carnassial Teeth (N. Henderson)

SPECIALIST-IN-TRAINING

White River Ballroom F

Dianna Ovbey, DVM, MS, DACVAA

As an experienced board-certified veterinary anesthesiologist, Dr. Ovbey has provided care in both academic and private practice settings on both small and large animals. She has worked in conjunction with specialists in nearly every field including surgery, dentistry, radiation oncology, internal medicine, and emergency/critical care. Because of her credentials and exclusive focus on the [safe administration of anesthesia and appropriate pain management](#), Dr. Ovbey is uniquely qualified to provide the most advanced care from examination to induction, through to recovery and restoration of quality of life.

Prior to launching SEVAS, Dr. Ovbey worked in private practice in Western Pennsylvania where she started the anesthesiology and pain management department, expanding the quality and depth of care for a wide range of patients. She also created a comprehensive technician and DVM anesthesia training program that was part of the curriculum at the hospital, further enhancing the care of every patient.

Dr. Ovbey received her formal veterinary training at the following institutions:

DVM: Ross University, Clinical Year: Texas A&M University

Medicine and Surgery Internship: University of Georgia

Master of Science: Michigan State University

Anesthesia Residency: Michigan State University

TIME	PRESENTATION	PRESENTER
1:30pm-2:20pm	Premedications Every Dentist Should Consider	Dr. Dianna Ovbey
2:30pm-3:20pm	Induction Agents Useful for the Dental Practice	Dr. Dianna Ovbey

LABORATORIES & SCHEDULE FRIDAY

Program subject to change/Lab attendance is limited
****See schedule on page 4 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
8:00am-12:00pm	Feline Radiology Lab "Positioning for Perfect Rads" (B Altier) Feline Radiology Lab (B Altier)	White River Ballroom C 1150 sq ft	Full-mouth feline radiographs can seem challenging, especially the maxillary premolars and the mandibular molars. This lab is intended to offer the attendee a simplified method to consistently and efficiently obtain diagnostic dental radiographs. An emphasis on understanding cause and effect as well as learning a consistent troubleshooting plan to ensure correction of positional errors will be taught.
8:00am-12:00pm	Canine Surgical Extraction Lab (T McCoy)	White River Ballroom A-B 2300 sq ft	This laboratory will focus on surgical dental extraction in dogs, proper mucogingival flap design, sectioning teeth, alveolar bone removal, proper use of winged dental elevators and dental luxators, proper use of extraction forceps, alveoloplasty, periosteal releasing incisions, tension-free flap design, and proper suturing of extraction sites. This lab will be presented twice by different presenters. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Restoratives Lab (M Balke)	Room 103-104 1900 sq ft	Laboratory will cover the basics of what dental restoratives are and their appropriate use. Attendees will gain a basic understanding of dental restoratives, recognize common uses for dental restoratives and learn how to apply dental restoratives. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Periodontal Flap Surgery and Guided Tissue Regeneration Lab (B Niemiec)	Room 101-102 1950 sq ft	This laboratory will initiate with the proper performance of a reverse bevel flap for periodontal surgery. Following this, we will demonstrate full and envelope flaps. Building on this we will learn guided tissue repair (bone augmentation) techniques. Finally, a special type of flap (semilunar) to increase attached gingiva will be taught. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Essential Periodontal Therapy: Necessary Tools and Techniques for the Veterinary Dental Team (C Weldin, R Brannon)	White River Ballroom D 1150 sq ft	Lab covers instrument selection, usage & care for the treatment of periodontal disease inclusive of probing, charting, identification of visual oral pathology, treatment planning, the use of ultrasonic & hand instrumentation, sharpening techniques & an overview of home care. Closed root planing & the use of perioceutics (eg. Doxirobe, Atridox) are included as a treatment modality. This is a hands-on wet lab utilizing extracted teeth, skulls & cadavers. The course is a necessary foundation for veterinarians & technicians who are providing dental services in their practices. These skills set the stage for advanced training in periodontal therapy & surgery. A lecture will precede the hands-on portion. Limited to 32 participants. (DVMs and Technicians)
12:10pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		

LABORATORIES & SCHEDULE FRIDAY (continued)

Program subject to change/Lab attendance is limited
****See schedule on pages 4 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

<u>TIME</u>	<u>LAB</u>	<u>ROOM</u>	<u>DESCRIPTION</u>
12:10pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		
1:30pm-5:30pm	Regional Anesthesia and Pain Management Lab (D Nossaman) Regional Anesthesia and Pain Management Lab (D Nossaman)	White River Ballroom C 1150 sq ft	This lab will focus on why regional blocks are useful for dental procedures, when and how to use and administer regional anesthesia, and the benefits of multi modal anesthesia, with a discussion of anesthetic drugs and dosages.
1:30pm-5:30pm	Feline Extraction Lab (M Blazeovich)	White River Ballroom A-B 2300 sq ft	A lecture (1 hr) followed by a 3 hour lab to teach the "how to's" of feline surgical extractions Limited to 30 participants. Attendees will learn surgical equipment used and proper surgical techniques. (DVMs Only) This lab will be presented twice.
1:30pm-5:30pm	Techniques for Completing Difficult Extractions in Dogs and Managing Extraction Complications (K Queck)	Room 103-104 1900 sq ft	This laboratory will focus on techniques for completing difficult extractions in dogs and the management of extraction complications. Participants may elect to perform surgical extractions of various teeth including performing surgical extractions on canine teeth, mandibular 1st molars, maxillary 4th premolars and maxillary 1st molars. Alternatively or in addition to performing surgical extractions participants may elect to manage fractured roots tips including retrieval of root tips from the intact alveolus, nasal cavity and/or mandibular canal. Participants may also elect to repair oronasal fistulas using a single or double-layer technique. In addition to these procedures participants may elect to place a circumferential wire to achieve stabilization of a symphyseal fracture. Limited to 30 participants. (DVMs Only) This lab will be presented three times by different presenters.
1:30pm-5:30pm	Vet-Tome Assisted Surgical Extraction Techniques in Dogs and Cats (K Stepaniuk)	Room 101-102 1950 sq ft	This laboratory is intended for practitioners that have confidence and experience in fundamental extraction and mucoperiosteal flap techniques. Participants will learn the principles and use of the Vet-Tome, learn how to use the Vet-Tome in simple extractions such as incisors and sectioned premolars and will learn how to use the Vet-Tome to augment surgical extraction of the strategic teeth such as the maxillary canine tooth, mandibular canine tooth, and carnassial teeth. Limited to 16 participants. (DVMs Only)
1:30pm-5:30pm	Dental Charting and the Oral Exam (L Bird) Dental Charting and the Oral Exam (L Bird)	White River Ballroom D 1150 sq ft	This lab will teach participants to perform 4-handed charting--a thorough oral exam and record the findings on a dental chart using AVDC abbreviations using 2 people. A short lecture will be given at the beginning of the lab. Limited to 24 participants. (DVMs and Technicians)

LABORATORIES & SCHEDULE SATURDAY

Program subject to change/Lab attendance is limited
 **See schedule on pages 4 for meetings held over the lunch hour.

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

<u>TIME</u>	<u>LAB</u>	<u>ROOM</u>	<u>DESCRIPTION</u>
8:00am-12:00pm	Canine Radiology Lab (M Berg)	White River Ballroom C 1150 sq ft	Dental radiographs are an essential part of the oral exam. The crown is just the tip of the iceberg. Approximately 42% of dental pathology is found subgingivally. Radiographs will help diagnose pathology that is not visible from the surface, confirm suspect pathology, as well as help, demonstrate the pathology to the client. Dental radiographs can improve the standard of care in your practice and increase your clinic's revenue. Learn methods to make taking canine dental radiographs a dream!
8:00am-12:00pm	Feline Extraction Lab (K Feigin)	White River Ballroom A-B 2300 sq ft	A lecture (1 hr) followed by a 3 hour lab to teach the "how to's" of feline surgical extractions Limited to 30 participants. Attendees will learn surgical equipment used and proper surgical techniques. (DVMs Only) This lab will be presented twice.
8:00am-12:00pm	Techniques for Completing Difficult Extractions in Dogs and Managing Extraction Complications (S Babbitt)	Room 103-104 1900 sq ft	This laboratory will focus on techniques for completing difficult extractions in dogs and the management of extraction complications. Participants may elect to perform surgical extractions of various teeth including performing surgical extractions on canine teeth, mandibular 1st molars, maxillary 4th premolars and maxillary 1st molars. Alternatively or in addition to performing surgical extractions participants may elect to manage fractured roots tips including retrieval of root tips from the intact alveolus, nasal cavity and/or mandibular canal. Participants may also elect to repair oronasal fistulas using a single or double-layer technique. In addition to these procedures participants may elect to place a circumferential wire to achieve stabilization of a symphyseal fracture. Limited to 30 participants. (DVMs Only) This lab will be presented three times by different presenters.
8:00am-12:00pm	Mandibular Fracture Repair Techniques: Interfragmentary and Interdental Wiring on a Bilateral Mandibular Fracture Model (K Taney, C Snyder)	Room 101-102 1950 sq ft	This laboratory will focus on mandibular fracture repair on a Sawbones models with mandibular body fractures. A combination of techniques such as interdental wiring and interfragmentary wiring will be utilized for reduction and stabilization. An introductory lecture will be given at the beginning of the laboratory. The focus of the lecture will be mostly on maxillofacial trauma and achieving normal occlusion, a cornerstone of jaw fracture repair. To that point, extraoral endotracheal tube placement will also be discussed and demonstrated to facilitate appliance placement and maintain correct occlusion. Proper placement of wire and acrylic appliances in the mouth will be reviewed and practiced. Acrylic application will be practiced in combination with the four basic interdental wiring techniques (Ivy loop, Stout, Essig, and Risdon). Interfragmentary wiring techniques will be utilized for treatment of a three-piece mandibular body fracture. Standard equipment utilized for minimally-invasive jaw fracture repair will be discussed and will be available for use during the laboratory. Stabilization of caudal mandibular or TMJ fractures with maxillomandibular fixation will be demonstrated. A few canine and feline cadaver heads will be available for demonstration and for additional practice by attendee as time permits. This laboratory would be ideal for those preparing for the AVDC examination and trainees in dental residency programs. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	The Technician's Role in Endodontic and Prosthodontic Procedures - Open to AVDT Mentees Only (VTS Training Lab Prerequisite Lecture) (W Gingerich)	White River Ballroom D 1150 sq ft	This is a 5-hour total length lab, 1 hour for lecture, 4 hours for the hands-on wet lab. We will cover the technician's role including setting up for, assisting and then cleaning up after the most common endodontic and prosthodontics procedures that veterinary dentists routinely perform. The lab will also include description and demonstration of the most common instruments and materials used for these procedures. This lab satisfies the requirements for technicians tracking to be VTS in dentistry and oral surgery.
12:10pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)

****See schedule on pages 4 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
12:10pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		
1:30pm-5:30pm	Canine Radiology Lab (L Bird)	White River Ballroom C 1150 sq ft	Dental radiographs are an essential part of the oral exam. The crown is just the tip of the iceberg. Approximately 42% of dental pathology is found subgingivally. Radiographs will help diagnose pathology that is not visible from the surface, confirm suspect pathology, as well as help, demonstrate the pathology to the client. Dental radiographs can improve the standard of care in your practice and increase your clinic's revenue. Learn methods to make taking canine dental radiographs a dream!
1:30pm-5:30pm	Canine Extraction Lab (B Muhlerin)	White River Ballroom A-B 2300 sq ft	Extraction of teeth within the canine patient can be dreaded by all veterinarians. The goal of this laboratory is to provide participants with the tools they need to make extractions a bit easier. The presentation will discuss the presenter's opinion on easy ways to extract the maxillary and mandibular canine teeth as well as the maxillary and mandibular carnassial teeth. The presentation will be in a Step-by-Step manner with a guide provided to each participant. Discussions of the presenter's favorite instruments as well as indications for extractions will also be provided. Relevant anatomy and the importance of dental radiography in attempting extractions will also be discussed. The presentation will close with tips and tricks that may make the process of open and closed surgical extractions easier for the general practitioner. The laboratory will be a hands-on experience in which they can use the information provided in the presentation and apply it to a cadaver experience. Participants are encouraged to ask questions and utilize the expertise of the laboratory assistants. After completion of the laboratory, participants will feel more comfortable with their extraction technique and apply the skills they learned in the clinical setting. (DVMs Only)
1:30pm-3:30pm	CBCT Wet Lab, What am I Looking at? (J. Mathis)	White River Ballroom D 1150 sq ft	Want to practice interpreting cone beam computed tomography images? Sign up for this lab, to participate in a live scan of a specimen illustrating easy image acquisition. The scan and other previous scans are sent to VoxelVue to allow each participant a virtual reality interface of the images acquired with 150-200um voxel resolution. Practice seeing the whole head in three dimensions and diagnosing the patient with a scan in as little as 28 seconds. This lab does NOT qualify for SIT-Rad hours.
3:30pm - 5:30pm	CBCT Wet Lab, What am I Looking at? (J. Mathis)		
1:30pm-5:30pm	Mandibular Fracture Repair Techniques: Interfragmentary and Interdental Wiring on a Bilateral Mandibular Fracture Model (G Thatcher, A Tsagawa)	Room 101-102 1950 sq ft	This laboratory will focus on mandibular fracture repair on a Sawbones models with mandibular body fractures. A combination of techniques such as interdental wiring and interfragmentary wiring will be utilized for reduction and stabilization. An introductory lecture will be given at the beginning of the laboratory. The focus of the lecture will be mostly on maxillofacial trauma and achieving normal occlusion, a cornerstone of jaw fracture repair. To that point, extraoral endotracheal tube placement will also be discussed and demonstrated to facilitate appliance placement and maintain correct occlusion. Proper placement of wire and acrylic appliances in the mouth will be reviewed and practiced. Acrylic application will be practiced in combination with the four basic interdental wiring techniques (Ivy loop, Stout, Essig, and Risdon). Interfragmentary wiring techniques will be utilized for treatment of a three-piece mandibular body fracture. Standard equipment utilized for minimally-invasive jaw fracture repair will be discussed and will be available for use during the laboratory. Stabilization of caudal mandibular or TMJ fractures with maxillomandibular fixation will be demonstrated. A few canine and feline cadaver heads will be available for demonstration and for additional practice by attendee as time permits. This laboratory would be ideal for those preparing for the AVDC examination and trainees in dental residency programs. (DVMs Only)
1:30pm-5:30pm	Advanced Periodontal Therapy (for VTS-Dentistry Candidates) (S. Startup, B Altier)	Room 103-104 1900 sq ft	This course will to cover multiple modalities for the treatment of periodontal disease. These treatment modalities will include surgical and non-surgical periodontal treatments. Oral and radiographic diagnosis with dental charting and treatment planning will be covered. Emphasis on the skill set for closed root-planing, and assisting with open-root planing with or without bone grafting, gingivectomy, gingivoplasty and apically repositioned flaps. Instrument set up and handling will also be covered.

LABORATORIES & SCHEDULE SUNDAY

Program subject to change/Lab attendance is limited
****See schedule on pages 4 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
8:00am-12:00pm	Room for VTS- Dentistry Exam	White River Ballroom A-B 2300 sq ft	AVDT Exam Candidates VTS Dentistry Exam
8:00am-12:00pm	Techniques for Completing Difficult Extractions in Dogs and Managing Extraction Complications (S Manfra)	Room 103-104 1900 sq ft	This laboratory will focus on techniques for completing difficult extractions in dogs and the management of extraction complications. Participants may elect to perform surgical extractions of various teeth including performing surgical extractions on canine teeth, mandibular 1st molars, maxillary 4th premolars and maxillary 1st molars. Alternatively or in addition to performing surgical extractions participants may elect to manage fractured roots tips including retrieval of root tips from the intact alveolus, nasal cavity and/or mandibular canal. Participants may also elect to repair oronasal fistulas using a single or double-layer technique. In addition to these procedures participants may elect to place a circumferential wire to achieve stabilization of a symphyseal fracture. Limited to 30 participants. (DVMs Only) This lab will be presented three times by different presenters.
8:00am-12:00pm	Regional Nerve Blocks and Periodontal Therapy (A Mills)	White River Ballroom D 1150 sq ft	Provides instruction in anatomical landmarks and administration of effective regional analgesia for the oral cavity. Provides instruction in understanding periodontal disease, treatment options including root planing and instrument identification and usage. Excellent Lab for Veterinary Technicians and DVM's.
12:10pm-1:30pm	Lunch on your own. Exhibit Hall closes at 2:00pm.

<https://jobs.banfield.com/>

Our mission is to revolutionize pet health and wellness, give back to our communities, and advance the veterinary profession — and that means you. Banfield started in 1955 as a small practice with big ideas about preventive care for pets. Now we're the largest general veterinary care practice in America, with more than 3,500 veterinarians at over 1,000 hospitals across the United States, including Puerto Rico. We care for more than 3 million pets every year. Banfield is committed to quality veterinary care. We strive to be a productive part of the community we serve. And we're dedicated to providing our associates with the tools, training, and support you need to excel and thrive.

Langley BC V2Z 0A9
CANADA
604-787-5185 Phone
<http://pronorthmed.ca>

At ProNorth Medical, we are committed to helping healthcare professionals improve patient outcomes and lower cost. We specialize in surgical sutures, specialty dental instruments and loupes. Through active customer engagement, we seek to better understand clinical challenges in order to recommend easy to use, cost effective products that help overcome these challenges.

REVBIO INC
(SPONSOR)

BOOTH #56
600 Suffolk St Suite 250
Lowell MA 01854
857-259-7287 Phone
<https://revbio.com/>

For RevBio, the revolution started in Massachusetts. It also started in nature with bio-inspiration from an amazing marine animal known as the Sandcastle Worm. Headquartered in Lowell, the company includes an extensive team of scientists, engineers, and clinicians who have reverse engineered a mineral-organic compound into a patented bioadhesive with an extensive platform of bone repair applications. A MassChallenge start-up accelerator alum, RevBio has won over 10 grants, received multiple patents, and is conducting its first-in-human clinical trial on its biomimetic bone adhesive.

Years spent hunched over patients damages your neck and spine. SurgiTel’s Dental loupes with light combat common working posture issues, keeping you pain-free throughout your career. Light reflects off white teeth and back into your eyes. If your headlight has a blue tint, you are at risk for eye damage. SurgiTel’s neutral dental loupe lights contain the least amount of blue light to protect your eyes’ health and vision. From different faces to different work, no two dentists are the same. SurgiTel’s dental loupes are individually designed with you in mind, ensuring that your loupes meet and exceed your needs.

Watch it Work!

Veterinary Dental Forum 2021 Virtual Fun Run

Saturday, October 23rd, 2021

6:30am - 7:30am

Participants of the Fun Run will meet in the hotel lobby at 6:15am and walk over to the start of the Fun Run/Walk.

Co-Sponsored by

Foundation for Veterinary Dentistry

Capital Campaign to Establish an Endowed Fund for Research and Education

Aim:

To raise funds for an Endowment that will provide a source for Research and Education Grants for years to come.

Supporting Ideas:

Currently the Foundation Grants Committee oversees planning and distribution of funds annually for research grants and educational support grants. Funding for these endeavors has come from annual revenues of the FVD and outside donations that vary year to year. The capital campaign aims to raise a sizable amount of money that would allow for stable, continuous annual funding of these endeavors.

www.veterinarydentistry.org/capital-campaign

Thank your client and support the Foundation for Veterinary Dentistry!

By purchasing these Thank You cards you are supporting the education and research activities of the Foundation. Your support for the FVD is used to provide dental education opportunities for veterinary students in the US, Canada and the Caribbean and fund research in veterinary dentistry.

NOTES

NOTES

The Foundation for Veterinary Dentistry operates exclusively for charitable, scientific, or educational purposes and was founded:

To educate the public about the importance of oral health in animals.

To advance the understanding of the science of veterinary dentistry among all veterinarians.

To further the knowledge of veterinary and related professions through education of veterinarians, veterinary technicians and other health-care professionals interested in veterinary dentistry and effective veterinary oral health care delivery.

To provide funding to colleges of veterinary medicine, veterinary technician schools, or other institutions, entities or individuals approved for funding by the Foundation to enhance the education of their students, provide appropriate equipment to facilitate teaching and delivery of effective oral care, and to support research projects in the field of veterinary oral health.
