October 25th
8:00am - 8:00pm

THURSDAY
October 26th
7:00am - 5:30pm

FRIDAY
October 27th
7:00am - 5:00pm

SATURDAY
October 28th
7:00am - 2:00pm

NEW! EXHIBIT HALL HOURS

WEDNESDAY
October 25th
Exhibit Hall Grand Opening
6:00pm - 8:00pm

THURSDAY
October 26th
9:30am - 6:00pm

FRIDAY
October 27th
9:30am - 4:00pm

SATURDAY
October 28th
9:30am - 2:00pm

WELCOME RECEPTION - Join us on Wednesday evening from 6:00pm-8:00pm for appetizers and drinks in the Grand Ballroom A-C Exhibit Hall. This is an opportunity for you to catch up with colleagues before the conference gets underway. You will need to either wear your badge or bring your welcome reception guest ticket with you to this event.

LABORATORIES

Check your welcome letter for the labs for which you are registered. Attendees' names will be on a sign in sheet in the each room. Be sure to sign in! All labs are located on the Third Floor, East Tower, see page 14. To register for an available lab on-site, visit the registration desk.

CONTINUING EDUCATION CREDITS

Attendees of the Veterinary Dental Forum can earn up to 24 hours of continuing education (CE). A certificate is provided in your attendee packet. Attendees must sign an attendance roster at registration for possible replacement of lost CE certificates in the future.

WEAR YOUR NAME BADGE - REQUIRED FOR ACCESS You must wear your name badge in order to attend any VDF event. It is your ticket into the conference lectures, exhibitor hall, and laboratories. If you purchased a guest ticket(s) for the Welcome Reception, your ticket can be found in your registration packet. You will need either a ticket or your badge in order to gain admission to this event.

MEETING SPACE - WIFI is available to all attendees throughout all meeting space.

MORNING AND AFTERNOON BREAKS

Mid-morning and afternoon breaks with beverages will be provided in the exhibit hall. Pre-session coffee will be in the Grand Ballroom A-C Foyer.

NEW! LUNCHES

Box lunches will be offered on Thursday, Friday and Saturday. These are included with Forum registration. Attendees were asked to indicate whether they would like to receive a box lunch on their registration form which will be indicated on your welcome letter. Lunch will be from 12:10pm-1:30pm to allow additional time to visit the exhibits.

CANCELLATIONS AND REFUNDS

On-site cancellations and refunds are no longer permitted. A charge of \$50 will be assessed for each change made in laboratory selections.

NO VIDEOTAPING OR PHOTOGRAPHY is permitted in any session or lab.

FUN RUN & WALK The VDF Fun Run will begin at 6:30am on Friday. Plan to meet at 6:15am in the Galt House Lobby for a casual start. Light refreshments will be available in the Grand Ballroom A-C Foyer after the event. Maps will be available at the registration desk; please note that the registration desk will not be open during the Fun Run on Friday. You may pick up your shirts Wednesday or Thursday at the main registration desk. If you are not registered, you may run with the group at no cost but t-shirts will not be available. Thank you to **Vetigel by Cresilon, Inc.** for sponsoring this event.

PEIVDF/FVD AUCTION - This event will be held on Friday, October 27th from 6:00pm - 8:30pm in the Archibald Room, 3rd Floor, West Tower. You are invited to attend this event and will have the opportunity to bid on many fun items. There will be a silent and live auction as well as drinks and hors d'oeuvres available.

FAREWELL RECEPTION - Join us on Saturday evening from 5:30pm-7:30pm for appetizers and drinks in the Grand Ballroom A-C Foyer.

A special **“Thank You”** to the sponsors of the
37th Annual Veterinary Dental Forum!

Foundation President's Message

Welcome to the Veterinary Dental Forum in Louisville, Kentucky!

It is a profound honor to welcome all new and returning attendees to our illustrious forum, where knowledge exchange and camaraderie lie at the heart of every session. Every year, the Dental Forum serves as a vital hub for veterinary dental professionals to gather, share and advance the frontiers of our specialized field.

A unique and heartfelt thank you is for **Dr. Barden Greenfield**, whose unparalleled dedication to the educational content of this conference has set new standards. Our deepest gratitude goes out to **Dr. Mary Volker, Dr. Chris Carter**, and **Dr. Kipp Wingo** for their dedication and tireless efforts organizing the laboratories. Their commitment and expertise play an integral role in the success of this forum.

To the esteemed **Foundation for Veterinary Dentistry** board of directors: **Dr. Barden Greenfield, Dr. Curt Coffman, Dr. Susan Crowder, Dr. David Clark, Dr. Boaz Arzi, Dr. Mary Volker, Mr. Andrew Schultz, Dr. Bonnie Shope, Ms. Carol Weldin** and **Ms. Mary Berg**, your vision and leadership are the pillars upon which this foundation stands. Your unwavering support and guidance have been instrumental in achieving our mission.

Foundation for Veterinary Dentistry, a recognized 501.c3 non-profit organization, thrives on the generosity of its patrons and member subscribers. We commit to channel 90% of our income towards education, research, and outreach. Our outreach includes funding dental equipment and training to veterinary schools and shelters in need, grants for vital dental research, and producing the Journal of Veterinary Dentistry in digital format six times yearly. To ensure that we continue to make strides in these areas, your support is invaluable now and in the future. Please consider the various opportunities to pay it forward and champion the cause of veterinary dentistry.

The tangible perks of these donations are tempting, but the valid reward lies in the knowledge that your contribution will alleviate animal suffering and promote high standards of veterinary dentistry. Moreover, the tax benefits of these donations offer a pragmatic reason for your generosity.

It truly takes a village. We stand shoulder to shoulder in this journey, bound by our vision and passion. I'd like to invite you all to contact our endowment chairs, **Dr. Barden Greenfield**, and **Dr. Curt Coffman**, to explore how you can further contribute to this notable cause.

I am truly humbled to be part of such a vibrant and dedicated community. Let's continue to inspire, share, and pave the way for future generations of veterinary dental professionals.

Warm Regards,

Jan Bellows, DVM
Board Certified Veterinary Dentist™
Diplomate, American Board of Veterinary Practitioners (Canine and Feline specialties)

SPECIALIST IN TRAINING - SPEAKER

Specialist in Training - Anesthesia

Lectures: Saturday, October 28th, 1:30pm - 5:40pm
Carroll Ford Room

Dr. Martin Kennedy, DVM, DACVAA

Dr. Martin Kennedy is a board-certified veterinary anesthesiologist with over a decade of clinical experience in both private practice and university settings. Dr. Kennedy attended Cornell University where he earned a Bachelor of Science degree in Chemical Engineering, and then the University of Wisconsin where he earned his Doctor of Veterinary Medicine degree. Following his graduation from veterinary school, Dr. Kennedy completed a rotating internship at the University of Minnesota, and then a residency in Anesthesia & Pain Management at the University of Wisconsin. Dr. Kennedy then joined a busy multi-specialty referral practice in Cincinnati, heading the anesthesia service there until December 2019. He then worked at the University of Minnesota as an associate professor of Anesthesia & Pain Medicine, with a strong focus on clinical teaching. In the Fall of 2022, he joined the Veterinary Dental Group and now works exclusively with dental specialty hospitals. He has particular interests in total intravenous anesthesia (TIVA), the management of high-risk patients, multimodal pain control, and teaching all things anesthesia.

TIME	LECTURE TITLES	SPEAKER
1:30pm-2:20pm	Anesthesia Plans: A Practical Approach	Dr. Martin Kennedy
2:30pm-3:20pm	Understanding Hypotension	Dr. Martin Kennedy
3:20pm-3:50pm	<i>Break - Grand Ballroom Foyer</i>	
3:50pm-4:40pm	Capnography	Dr. Martin Kennedy
4:50pm-5:40pm	Anesthetizing Patients with Comorbidities	Dr. Martin Kennedy

***Residents needing their specialty hours must sign into the Specialist in Training lectures on the sign-in form that will be located on a table inside the back of the room. SIT certificates will be emailed directly after the conference to those that signed up.**

***Certificates cannot be rendered if you did NOT sign the form.**

KEYNOTE SPEAKER

Education in Veterinary Dentistry Advanced Track

Friday, October 27th, 8:00am - 4:20pm
Nunn/Breathitt Room

Andrew West

Andrew West is the Assistant Dean of Teaching and Learning and the Director of the Academy for Teaching and Learning in the College of Veterinary Medicine and Biomedical Sciences at Colorado State University. His role includes working with faculty to develop innovative approaches to sustain and promote excellence in educational programs and to make improvements in areas identified by faculty, students, alumni, employers, and the veterinary profession. Prior to joining CSU, Andrew was an Assistant Professor of Teacher Education at Western Kentucky University. Andrew holds an MEd and PhD in Curriculum and Instruction from the University of Missouri and a BS in Biological Sciences from Montana State University.

Have you always wanted to have your own practice focused solely on general Dentistry? Have you dreamed of a 4 day work week, no nights, no weekends, no emergencies, and no euthanasia?

Pet Dental USA is a family-owned business offering franchising opportunities to make your start-up easy. You own it, we will help you.

Pet Dental USA currently has four (4) locations in Arizona, but we can get you started on your way to professional freedom/joy in any state!

Check us out at: www.PetDentalUSA.com | Visit us at Booth #822

Dr. Jennifer Redmon Ph. 928-533-9541 | Email. drjennidvm@pdusa.net

*****Employment opportunities also available at existing locations*****

KEYNOTE SPEAKER

Maxillofacial Developmental Dentistry Day Advanced Track

Saturday, October 28th, 8:00am - 4:20pm
Nunn/Breathitt Room

Dr. Peggy Kelley, MD, FACS, FAAP

Peggy Kelley MD is a pediatric otolaryngologist currently practicing at Providence St. Vincent Medical Center in Portland, Oregon.

Dr. Kelley completed her undergraduate degree at Stanford University with honors and her medical degree is from the University of Pittsburgh. After completing a residency in Otolaryngology, Head and Neck Surgery at the University of Rochester she completed a pediatric fellowship at Cincinnati Children’s Hospital.

Peggy was Associate Professor of Otolaryngology, Head and Neck surgery at the University of Colorado until 2020 when she moved home to Oregon. Her research included maternal-fetal collaboration, ethics of tracheostomy decision making and frenulotomy. She was the Chair of the Education Committee and current President of the Interamerican Society of Pediatric Otolaryngology, Treasurer for the American Society of Pediatric Otolaryngology and Executive Board member of the Section on Otolaryngology, Head and Neck Surgery for the American Academy of Pediatrics.

While at Children’s Hospital Colorado she started the Vascular Anomalies clinic, and was Director of the Microtia, and Voice clinics. Surgery for congenital anomalies and palate surgery for voice improvement are areas of interest.

Dr. Kelley enjoys lifelong learning and is looking forward to collaborating with her daughter, Jennifer Kelley DVM at the upcoming conference.

Dr. Kristen Lowe, DDS, MS

Dr. Lowe is a Board-Certified orthodontist with a subspecialty in managing patients with craniofacial conditions, such as cleft lip and palate and hemifacial microsomia. She’s an Associate Professor in the Division of Plastic and Reconstructive Surgery at the University of Colorado and the founder of the Craniofacial Orthodontics program at Children’s Hospital Colorado.

Dr. Lowe graduated with honors from University of California, Los Angeles School of Dentistry. Thereafter, she completed her orthodontics residency and Master of Science degree at Columbia University, where she served as Class President. Following residency, she became one of the few orthodontists to have completed a fellowship in Craniofacial and Special Care Orthodontics at NYU Langone Medical Center and was awarded the Craniofacial Anomalies and Special Care Training Award by the American Association of Orthodontists upon completion of her training. She strongly believes in giving back to her profession and is the current President of the Rocky Mountain Society of Orthodontists, the Membership Committee Chair for the American Cleft Palate Craniofacial Association, and she sits on the Board for the American Association of Orthodontists Foundation.

iM3® Radiology Solutions

Leading the way with product innovation, enhanced patient care and the greatest range of ergonomic and customisable equipment, iM3 has all your veterinary dental radiology solutions.

CR 7 VET

X-Ray Scanner

- Fast processing times, 12 sec. for size 2 plate
- Highest Resolution 40 LP/mm theoretical, with 25 LP/mm actual
- Incredibly compact at 23cm x 24cm. Weight only 6kg
- Unique design protects unit and radiographs from dust, hair, and particles that reduce image quality
- Plate Feeder accepts all image plate size from 0 - 5 including
- R3 Rabbit Plates, and is easily removed for cleaning

ORDER CODE: X7000

CR 8 VET

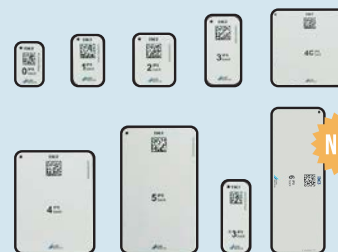

X-Ray Scanner

- Twice the scanning speed with 2 parallel plate slots
- Highest Resolution 40 LP/mm theoretical, with 25 LP/mm actual
- Adjustable resolutions allows for fast scanning times. Up to 4 x size 2 image plates can be read in as little as 25 seconds
- High resolution glass touch display, patented PCS technology for excellent image quality
- The largest range of plate shapes in the veterinary dentistry market

ORDER CODE: X8101

iM3 plates are the largest range of plate shapes available to the veterinary dental market.

Introducing the NEW size 6, with great potential for long snouted dogs, extremities, and small exotics.

DR Sensor X - Size 2

X-Ray Sensor

- Highest Resolution 26.3 LP/mm theoretical, with 20 LP/mm actual
- Increased volume and eliminates need for dark room
- Instantaneous image acquisition displayed on screen in seconds
- CMOS technology ensures the fast transmission of high-resolution images
- The optimized digital images can be shared directly with other users and easily archived
- Multiple sizes, large format DR Sensors now available

ORDER CODE: X5000

DR Sensor Y - Size 4

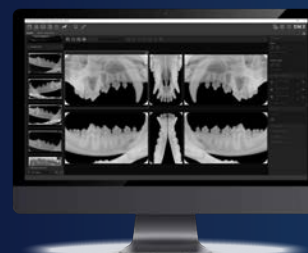

X-Ray Sensor

- Impressive resolution of 20 lp/mm
- Matches dimensions of size 4 CR plate at 53.8 x 77.1 x 6.5 mm
- Built-in Wide Dynamic Range, as a result is forgiving and can produce clear, sharp images in more conditions
- Uses a CsI scintillator as opposed to the more common Gadox-based sensors, resulting in far higher resolution and less noise

ORDER CODE: Y5200

Veterinary Software

Vet-Exam PRO

Dental Software

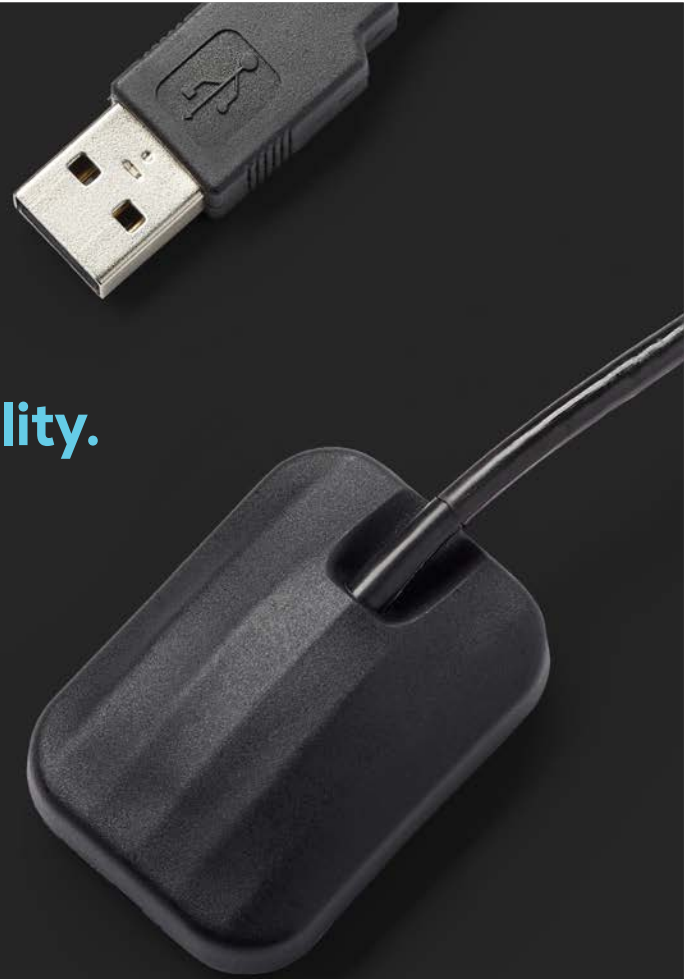

The fast, reliable and modern veterinary dental x-ray software, that pairs perfectly with the iM3 CR7 & CR 8 Vet Scanner.

- Veterinary specific layouts
- Integrated capture & viewer allows for immediate comparison between x-rays
- Images are automatically saved in the background
- Full DICOM compliance

Bite resistant. Exceptional image quality. Exclusive new design.

The next-generation Midmark Bite-Resistant Sensor is designed for the unique needs of the animal health market. It combines a patent-pending geometric housing design and unsurpassed image quality to provide clear, crisp images with exceptional resistance to bite damage—FOUR TIMES stronger than our standard sensor!

Designed for durability and longevity, Midmark's bite-resistant digital sensor is a worldwide-exclusive design.

- Provides exceptional high-quality images, even when using low-dose radiation.
- Imparts a protective plate between the housing and imaging components, further enhancing durability.
- Uses Kevlar®-reinforced cable for reliability and a water-tight connection to promote asepsis.
- Embedded with calibration files to simplify integration and workflow.
- Includes preloaded imaging software with practice management integration capabilities.
- Supported by our clinical and technical teams.

ADVANCED Nunn/Breathitt

Education in Veterinary Dentistry

Andrew West is the Assistant Dean of Teaching and Learning and the Director of the Academy for Teaching and Learning in the College of Veterinary Medicine and Biomedical Sciences at Colorado State University. His role includes working with faculty to develop innovative approaches to sustain and promote excellence in educational programs and to make improvements in areas identified by faculty, students, alumni, employers and the veterinary profession. Prior to joining CSU, Andrew was an Assistant Professor of Teacher Education at Western Kentucky University. Andrew holds an MEd and PhD in Curriculum and Instruction from the University of Missouri and a BS in Biological Sciences from Montana State University.

SPECIALIST-IN-TRAINING

Carroll Ford

Martin Kennedy, DVM, DACVAA

Dr. Martin Kennedy is a board-certified veterinary anesthesiologist with over a decade of clinical experience in both private practice and university settings. Dr. Kennedy attended Cornell University where he earned a Bachelor of Science degree in Chemical Engineering, and then the University of Wisconsin where he earned his Doctor of Veterinary Medicine degree. Following his graduation from veterinary school, Dr. Kennedy completed a rotating internship at the University of Minnesota, and then a residency in Anesthesia & Pain Management at the University of Wisconsin. Dr. Kennedy then joined a busy multi-specialty referral practice in Cincinnati, heading the anesthesia service there until December 2019. He then worked at the University of Minnesota as an associate professor of Anesthesia & Pain Medicine, with a strong focus on clinical teaching. In the Fall of 2022, he joined the Veterinary Dental Group and now works exclusively with dental specialty hospitals. He has particular interests in total intravenous anesthesia (TIVA), the management of high-risk patients, multimodal pain control, and teaching all things anesthesia.

TIME	PRESENTATION	PRESENTER
1:30pm-2:20pm	Anesthesia Plans: A Practical Approach	Dr. Martin Kennedy
2:30pm-3:20pm	Understanding Hypotension	Dr. Martin Kennedy
3:20pm-3:50pm	Break - Grand Ballroom Foyer	
3:50pm-4:40pm	Capnography	Dr. Martin Kennedy
4:50pm-5:40pm	Anesthetizing Patients with Comorbidities	Dr. Martin Kennedy

2023 VDF PROGRAM GRID - SATURDAY LECTURES

Program subject to change (for current schedule, refer to VDF website; www.VeterinaryDentalForum.org)

****See schedule on page 8-9 for meetings held over the lunch hour.**

Maxillofacial Developmental Dentistry Day

Dr. Peggy Kelley, MD, FACS, FAAP

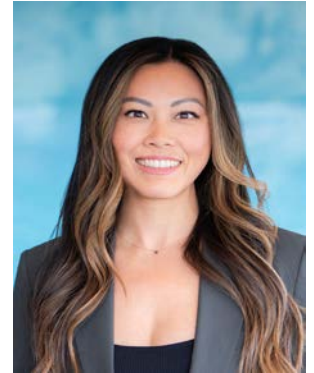

Peggy Kelley MD is a pediatric otolaryngologist currently practicing at Providence St. Vincent Medical Center in Portland, Oregon.

See page 12 for full Bio.

Dr. Kristen Lowe, DDS, MS

Dr. Lowe is a Board-Certified orthodontist with a subspecialty in managing patients with craniofacial conditions, such as cleft lip and palate and hemifacial microsomia. She's an Associate Professor in the Division of Plastic and Reconstructive Surgery at the University of Colorado and the founder of the Craniofacial Orthodontics program at Children's Hospital Colorado.

See page 12 for full Bio.

The Foundation for Veterinary Dentistry operates exclusively for charitable, scientific, or educational purposes and was founded:

To educate the public about the importance of oral health in animals.

To advance the understanding of the science of veterinary dentistry among all veterinarians.

To further the knowledge of veterinary and related professions through education of veterinarians, veterinary technicians and other health-care professionals interested in veterinary dentistry and effective veterinary oral health care delivery.

To provide funding to colleges of veterinary medicine, veterinary technician schools, or other institutions, entities or individuals approved for funding by the Foundation to enhance the education of their students, provide appropriate equipment to facilitate teaching and delivery of effective oral care, and to support research projects in the field of veterinary oral health.

www.VeterinaryDentistry.org

LABORATORIES & SCHEDULE THURSDAY

Program subject to change/Lab attendance is limited
****See schedule on page 8-9 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
8:00am-10:00am	Feline Radiology Lab "Positioning Simplified" (B. Altier)	Coe Room 3rd Floor, East Tower	Using a simplified method, the learner will engage in full-mouth feline radiographs using the ABC method to obtain diagnostic images. The emphasis will be placed on efficiency, strategies to obtain more than one view of a tooth area if necessary, and problem-solving techniques if an image is not diagnostic. Limited to 20 participants.
10:00am-12:00pm	Feline Radiology Lab "Positioning Simplified" (B. Altier)		
8:00am-12:00pm	Canine Surgical Extraction Lab (T. McCoy)	Jones Room 3rd Floor, East Tower	This laboratory will focus on surgical dental extraction in dogs, proper mucogingival flap design, sectioning teeth, alveolar bone removal, proper use of winged dental elevators and dental luxators, proper use of extraction forceps, alveoloplasty, periosteal releasing incisions, tension-free flap design, and proper suturing of extraction sites. This lab will be presented three times. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Luxating All the Way (L. Legendre)	French Room 3rd Floor, East Tower	This laboratory will cover extraction techniques using luxators. It will show how to extract teeth while minimizing or eliminating the need to remove buccal bone. It will demonstrate the advantages of this technique to both the patient and the operator. (DVMs Only)
8:00am-10:00pm	Introduction to CBCT Lab Basic Level (D. Sarment) Advanced CBCT Lab (A. Reiter, L. Villamizar-Martinez)	Segell Room 3rd Floor, East Tower	This interactive lab will introduce the DVM, resident or Diplomate to pathology recognized on a day-in-day-out basis. Attention to early bone loss, early and advanced apical pathology, tooth resorption, bone loss associated with palate defects, TM luxation and maxillo-mandibular fractures. *This is not a hands-on lab but rather slides and videos from actual cases; this is a CBCT interpretation lab. A description of how to use will be made but actual hands-on with the machine is not offered. To become more familiar with the machine, a machine is set up at the Dental Focus booths in the exhibit hall.
10:00am-12:00pm			This interactive lab is for those that have CBCT in their practice and want to hone in on advanced imaging techniques and pathology. Structural dental and bone anomalies, nuances in periodontal and endodontic pathology, maxillofacial trauma and tumor evaluation, temporomandibular joint pathology, contrast imaging of soft tissues when applicable, and 3D reconstruction will be discussed in an interactive format. * A requirement is that one presently has a CBCT unit in their practice. This is not a hands-on lab, and working with a CBCT machine is not offered. CBCT images of dogs and cats supported by patient history, clinical photographs, dental radiographs, and other information are discussed. To become more familiar with the machine, a machine is set up at the Dental Focus booths in the exhibit hall. (DVMs Only)
8:00am-12:00pm	Essential Periodontal Therapy: Necessary Equipment and Techniques for Proper Diagnosis FOR DVM's and Technicians (C. Weldin, R. Brannan, P. Mitchell)	Stopher Room 3rd Floor, East Tower	This lab covers instrument selection, usage and care for the treatment of periodontal disease inclusive of probing, charting, identification of visual oral pathology, treatment planning, the use of ultrasonic and hand instrumentation, sharpening techniques and an overview of home care. Closed root planing and the use of perioceutics (eg. Doxirobe, Atridox) are included as a treatment modality. This is a hands-on wet lab utilizing extracted teeth, skulls & cadavers. The course is a necessary foundation for veterinarians and technicians who are providing dental services in their practices. These skills set the stage for advanced training in periodontal therapy and surgery. A lecture will precede the hands-on portion. Limited to 32 participants. (Excellent lab for DVMs and Technicians)
12:00pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		

LABORATORIES & SCHEDULE THURSDAY *(continued)*

Program subject to change/Lab attendance is limited
****See schedule on pages 8-9 for meetings held over the lunch hour.**

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
12:00pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		
1:30pm-5:30pm	Ergonomics Master Class (D. Rubino Dencek, C. Purdy)	Coe Room 3rd Floor, East Tower	This course takes a holistic approach toward workplace ergonomics to offer insight into proactive practices and the use of armamentarium and innovative products. The combination of lecture style and hands-on demonstration will enhance each attendees' knowledge of available preventive products and alternative options to reduce their risk for developing a musculoskeletal disorder/injury along their individual ergonomic journey. Part One: Hierarchy of Control is explained and correlated to multiple risks to each of the five human senses. <ul style="list-style-type: none"> • Sight: loupes, magnification, indirect vision, platform adjustment. • Hearing: Overexposure to noise. • Smell: Water line contaminants and air filtration. • Taste: Dehydration and proper diet. • Touch: Pinch-grip force, repetitive stress injuries and cord management product. Reduced pressure point from balanced seating. Part Two: Hands-on demonstration and application of ergonomic best-practice methods. • Stand/Sit • Clinical Instrumentation • Office Application • Stretches and strength-training Part Three: • The difference between the technical side and the people side of Change Management. • Top 10 questions that build a barrier for others to embrace and adopt change. • Discussion of an audience-based focus problem and audience solutions for the top 10 barriers to acceptance of change. Limited to 30 participants.
1:30pm-5:30pm	Feline Extraction Lab (K. Feigin)	Jones Room 3rd Floor, East Tower	A one-hour lecture followed by a three-hour lab to teach the "how to's" of feline surgical extractions. Attendees will learn surgical tools and equipment used and how to properly extract feline teeth, as well as how to prevent/reduce complications. This lab will be presented twice. Limited to 30 participants. (DVMs Only)
1:30pm-5:30pm	Advanced Canine Extraction Lab (K. Queck)	French Room 3rd Floor, East Tower	This laboratory will focus on some of the complicated extractions a practitioner experiences in a day-to-day scenario. You will be extracting caudal cheek teeth, mandibular canine teeth, mandibular 1st molars as well as discussion on other complications such as oronasal fistulas and retained tooth roots. After this lab, you will feel more confidence with these difficult extractions. This lab will be presented twice. Limited to 30 participants. (DVMs Only)
1:30pm-5:30pm	Mandibular Fracture Repair <i>(This laboratory qualifies for specialty hours)</i> (K. Taney, C. Snyder)	Segell Room 3rd Floor, East Tower	This laboratory will focus on mandibular fracture repair on a Sawbones model with a mid-body fracture. An introductory lecture will be given at the beginning of the laboratory which will focus on maxillofacial trauma and achieving normal occlusion, a cornerstone of maxillofacial fracture repair. To that point, extraoral endotracheal tube placement via the transmylohyoid approach will also be discussed and demonstrated to facilitate appliance placement and maintain correct occlusion. Appropriate placement of wire and composite appliances in the mouth will be reviewed and practiced using the four basic interdental wiring techniques (Ivy loop, Stout, Essig, and Risdon). Standard equipment utilized for minimally-invasive jaw fracture repair will be discussed and will be available for use during the laboratory. This laboratory would be ideal for those in dental residency programs. Limited to 30 participants. (DVMs Only)
1:30pm-3:30pm	Dental Charting and the Oral Exam (L. Bird)	Stopher Room 3rd Floor, East Tower	This lab will instruct participants in 4-handed dental charting--working in pairs, participants will identify oral pathology and record it on a dental chart using AVDC abbreviations. Participants are required to attend the pre-requisite lecture 'Dental Charting and the Oral Exam', Thursday, October 26th, 10:20am - 11:10am, prior to taking this lab. Limited to 24 participants. (DVMs and Technicians)
3:30pm-5:30pm	Dental Charting and the Oral Exam (L. Bird)		

LABORATORIES & SCHEDULE FRIDAY

Program subject to change/Lab attendance is limited

**See schedule on pages 8-9 for meetings held over the lunch hour.

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
8:00am-12:00pm	Canine Radiology Lab (M. Berg)	Coe Room 3rd Floor, East Tower	Dental radiographs are an essential part of the oral exam. The crown is just the tip of the iceberg. Approximately 42% of dental pathology is found subgingivally. Radiographs will help diagnose pathology that is not visible from the surface, confirm suspect pathology as well as help demonstrate the pathology to the client. Dental radiographs can improve the standard of care in your practice and increase your clinic's revenue. Learn methods to make taking dental radiographs a dream! Pre-requisite lecture: Tips and Tricks to Great Dental Radiographs - Thursday, October 26th, 11:20am-12:10pm, Technician Track. Limited to 24 participants.
8:00am-12:00pm	Feline Extraction Lab (M. Blazeovich)	Jones Room 3rd Floor, East Tower	A one-hour lecture followed by a three-hour lab to teach the "how to's" of feline surgical extractions. Attendees will learn surgical tools and equipment used and how to properly extract feline teeth, as well as how to prevent/reduce complications. This lab will be presented twice. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Canine Surgical Extraction Lab (B. Mulherin)	French Room 3rd Floor, East Tower	Extraction of teeth within the canine patient can be dreaded by all veterinarians. The goal of this laboratory is to provide participants with the tools they need to make extractions a bit easier. The presentation will discuss the presenter's opinion on easy ways to extract the maxillary and mandibular canine teeth as well as the maxillary and mandibular carnassial teeth. The presentation will be in a step-by-step manner with a guide provided to each participant. Discussions of the presenter's favorite instruments as well as indications for extractions will also be provided. Relevant anatomy and the importance of dental radiography in attempting extractions will also be discussed. The presentation will close with tips and tricks that may make the process of open and closed surgical extractions easier for the general practitioner. The laboratory will be a hands-on experience in which they can use the information provided in the presentation and apply it to a cadaver experience. Participants are encouraged to ask questions and utilize the expertise of the laboratory assistants. After completion of the laboratory, participants will feel more comfortable with their extraction technique and apply the skills they learned in the clinical setting. This lab is repeated three times. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	VetWelding Lab (Diplomates/Residents Only) (J. Lewis)	Segell Room 3rd Floor, East Tower	This wet lab will provide an introduction to a new technology. VetWelding absorbable plates are a useful tool in the oral surgeon's armamentarium for treatment of certain jaw fractures. The system utilizes a thermoplastic polymer that allows plates to be contoured to the shape of mandible/maxilla. Plates are secured to the bone with pins and an ultrasonic device that briefly liquefies the pin, allowing the pin to "lock" into the spaces within cancellous bone and allows the pin and plate to become a single construct. Thermoplastic suture-holding anchors will also be discussed and utilized in the wet lab to supplement plate fixation. A 50 minute lecture will be followed by 3 hours of wet lab. Limited to 20 participants. (Diplomates/Residents Only)
8:00am-12:00pm	The Technician's Role in Endodontic and Prosthodontic Procedures - Open for AVDT Mentees Only (W. Gingerich)	Stopher Room 3rd Floor, East Tower	We will cover the technician's role including setting up for, assisting and then cleaning up after the most common endodontic and prosthodontics procedures that veterinary dentists routinely perform. The lab will also include description and demonstration of the most common instruments and materials used for these procedures. This lab satisfies the requirements for technicians tracking to be VTS in dentistry and oral surgery. (Open for AVDT Mentees Only)
12:00pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		

LABORATORIES & SCHEDULE FRIDAY (continued)

Program subject to change/Lab attendance is limited

**See schedule on pages 8-9 for meetings held over the lunch hour.

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
12:00pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		
1:30pm-3:30pm	Regional Anesthesia and Pain Management Lab (D. Nossaman)	Coe Room 3rd Floor, East Tower	Many of our patients in veterinary dentistry are older or have compromised core body functions. It is important to choose an anesthetic regimen that will provide these animals with the least risk and offer adequate analgesia intraoperatively and postoperatively. Regional anesthesia is an excellent adjunct to general inhalation anesthesia because it will: 1.) Allow the anesthetist to reduce systemic anesthesia levels (and risks) while providing appropriate analgesia. 2.) Act to create vasoconstriction (lidocaine) which will enhance hemostasis. 3.) Provide long-lasting postoperative analgesia (bupivacaine + an opioid). 4.) Decrease the cost of inhalant anesthesia. This lab will provide attendees with the rationale for using regional analgesia, as well as, the techniques to use the local drugs appropriately in dogs and cats. Limited to 20 participants.
3:30pm-5:30pm	Regional Anesthesia and Pain Management Lab (D. Nossaman)		
1:30pm-5:30pm	Advanced Canine Extraction Lab (J. Alterman)	Jones Room 3rd Floor, East Tower	This laboratory will focus on common complicated extractions that arise in general practice. We will focus on the extractions of caudalmaxillary premolars and molars, mandibular canines and mandibular first molars. Complications of extractions will be discussed as well including oronasal fistulas and retained tooth roots. The lab will begin with a lecture to give step-by-step guidance followed by hands onwork. This lab is repeated two times. Limited to 30 participants. (DVMs Only)
1:30pm-5:30pm	Restorations Lab (I. Luskin)	French Room 3rd Floor, East Tower	This advanced lab will teach the resident or DVM with advanced dental training the materials and methods necessary to perform the following: restoration of different types of tooth fracture, cavity preparation, restoration of enamel defects and restoration of root canal access sites. Discussion and usage of a variety of restorative and composite materials will be offered. Limited to 30 participants. (DVMs Only)
1:30pm-5:30pm	Practical Periodontal Surgery with Bone Augmentation (H. Lobprise)	Segell Room 3rd Floor, East Tower	With advanced periodontal disease, there are still methods of therapy available that can help save some compromised teeth. With moderate pockets, root planing and perioceutic therapy can help break the cycle of destruction. Resective procedures with gingivoplasty and proximal wedge techniques can surgically improve periodontal defects. With deeper infrabony bony pockets, soft tissue management combined with surgical exposure and placement of osseopromotive materials can help save teeth that would otherwise be lost. Limited to 24 participants. (DVMs Only)
1:30pm-5:30pm	Advanced Periodontal Therapy (for VTS-Dentistry Candidates) (H. Duncan, B. Altier)	Stopher Room 3rd Floor, East Tower	VTS Candidates for Dentistry need to understand the basic and advanced therapies available for treatment of periodontal disease in companion animals, as well as the instruments and equipment used to provide these treatments. Rotating laboratory stations will provide exposure and understanding of the advanced periodontal therapies that are available for treatment in dogs and cats, such as gingivectomy, closed and open root planing, apical repositioning flaps and use of perioceutic agents. The instruments used for these treatments will be discussed and used, as well how to recognize them, sharpen them, and why having sharp periodontal instruments is necessary and appropriate. Limited to 24 participants. (VTS Candidates Only)

LABORATORIES & SCHEDULE SATURDAY

Program subject to change/Lab attendance is limited
 **See schedule on pages 8-9 for meetings held over the lunch hour.

Veterinary dentistry is a complex specialty which requires years of education, training and practice. The wet labs and workshops offered by the Veterinary Dental Forum help practitioners to more effectively diagnose and intercept dental problems and treat or refer them appropriately. The lectures and labs (fundamental, intermediate and advanced) are designed to be educational, practical and interesting for those just getting started as well as for those well established in the field of dentistry. Pre-registered attendees will be required to sign in at each lab.

TIME	LAB	ROOM	DESCRIPTION
8:00am-12:00pm	Room for VTS- Dentistry Exam	Coe Room 3rd Floor, East Tower	AVDT Exam Candidates VTS Dentistry Exam
8:00am-12:00pm	Apicoectomy Lab (Surgical Endodontics) (B. Niemiec)	Jones Room 3rd Floor, East Tower	This advanced lab will teach the resident or Diplomate the proper technique for a retrograde root canal therapy. Attention to flap presentation, proper bone removal, complete apical seal and surgical closure will be emphasized. (Diplomates/Residents Only)
8:00am-12:00pm	Canine Surgical Extraction Lab (C. Durand)	French Room 3rd Floor, East Tower	This laboratory is intended to help with basic techniques for commonly extracted teeth in dogs. Focus will be on the maxillary and mandibular canine teeth as well as the maxillary fourth premolar and mandibular first molar teeth. Proper flap design, bone removal, elevation, extraction and incision closure will be discussed and demonstrated. Instrumentation options for all stages of the procedure will be discussed. Management of potential complications associated with extractions will also be covered in this comprehensive laboratory. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Oral Surgery: Rostral Maxillectomy and Mandibulectomy Lab (R. Furman)	Segell Room 3rd Floor, East Tower	Hands on laboratory covering indications for rostral mandibulectomy and maxillectomy, appropriate margins required for the most common oral tumors, how to determine surgical margins, proper surgical techniques, equipment and materials needed and performing the surgeries step-by-step. Limited to 30 participants. (DVMs Only)
8:00am-12:00pm	Regional Nerve Blocks (Pre-requisite lecture) (D. Rollings)	Stopher Room 3rd Floor, East Tower	This lab will provide an opportunity to perform dental nerve blocks on dog and cat specimens. We will cover caudal maxillary techniques, infraorbital technique, inferior alveolar techniques, and indications for middle mental blocks. Pre-requisite lecture - Technicians track, Thursday, October 26th 1:30pm - 2:20pm - Dental Nerve Blocks for Zen Anesthesia. Excellent Lab for Veterinary Technicians and VTS Candidates.
12:00pm-1:30pm	Box Lunches available in exhibit hall for registered attendees and exhibitors (1 each)		
1:30pm-5:30pm	Rabbit and Rodent Dentistry Lab (L. Legendre)	Jones Room 3rd Floor, East Tower	This laboratory will review the specific dental equipment required and the common dental conditions encountered in rabbits and herbivorous rodents. It will show the attendant how to extract incisors and cheek teeth intraorally as well as surgically. It will also demonstrate how to perform regional dental blocks in rabbits. Pre-requisite lecture in Intermediate Track, Saturday, October 28th, 11:20am - 12:10pm. Limited to 20 participants. (DVMs Only)
1:30pm-3:30pm	Instrument Sharpening for the DVM and Technician (J. Bohannon)	Stopher Room 3rd Floor, East Tower	This lab will cover how to sharpen common dental instruments, ensure proper angles and handling with the RX Honing machine. We will also briefly touch on sharpening with hand stones. During this lab, we will have attendees bring in their own dental instruments like: dental elevators, periosteal elevators, curettes, scalers, scissors that they will sharpen. We will teach them how to look for the dull edge, find the proper angles, and the correct edge to sharpen the instruments. And finally, the importance of lighting (loops with magnification and lighting) during the sharpening process. We will teach them how to sharpen instruments using the RX Honing machine easily and quickly and go over how to use sharpening stones to hand sharpen instruments. Limited to 24 participants.
3:30pm-5:30pm	Instrument Sharpening for the DVM and Technician (J. Bohannon)		
1:30pm-5:30pm	Veterinary Student Extraction Lab (J. Johnson)	French Room 3rd Floor, East Tower	Hands-on practice of dental extractions is the best way to improve this critical skill for future general practitioners. Please join a group of dental specialists and residents in order to learn the steps of a comprehensive extraction of dog teeth and have time for supervised practice in this laboratory setting. Each attendee will understand the steps of a comprehensive extraction, understand equipment used for each step of an extraction, and perform a surgical extraction in a dog. Limited to 15 students. (Dental Educators and DVM Students Only)

Participants of the Fun Run will meet in the hotel lobby at 6:15am and walk over to the start of the Fun Run/Walk.

Pick up your fun run shirts during conference registration check-in!

Sponsored by:

RevBio Animal Health was started with one goal in mind—to end veterinary medicine’s fifty year search for a biocompatible bone adhesive. Effective for bone-to-bone in wet field applications, Tetranite® Vet is a revolutionary biomaterial that promises to transform bone repair for both patients and clinicians

DEMONSTRATED RIDGE MAINTENANCE WITH TETRANITE VET ALVEOLAR FILL

Our Multi-center Study in a Community Model has enrolled 48 patients treated with Tetranite® Vet for Alveolar Fill (TN-VAF) to date with 45 having completed Short-Term follow-up visits of 6 to 12 weeks; 27 of these have gone on to Long-Term follow-up of 6 to 12 months. Analysis of this interim data indicates significant improvement for Alveolar Ridge Maintenance with the use of TN-VAF vs control (blood clot only) to the 6 to 12 week follow-up; this trend continuing to the 6 to 12 month follow-up. RevBio is actively engaged with FDA Center for Veterinary Medicine to facilitate the earliest possible release to market for this revolutionary, osteopromotive product. Visit booth #824 to handle the product and witness the adhesive properties of Tetranite. Come by to learn more about its efficacy from a detailed analysis of results to date and plans for the future of additional veterinary products including for mandibular fracture fixation.

THANKS TO ALL OUR MULTI-CENTER STUDY INVESTIGATORS FOR SHOWCASING TETRANITE'S SAFE AND EFFECTIVE USE AND PREPARING FOR ITS FDA APPROVAL!

Foundation for Veterinary Dentistry

Capital Campaign to Establish an Endowed Fund for Research and Education

GOAL:

Raise funds for an Endowment that will provide a source for Research and Education Grants for years to come!

SUPPORTING IDEAS:

Currently, the Foundation Grants Committee oversees planning & distribution of funds annually for research & educational support grants. Funding for these endeavors has come from the annual revenues of the FVD and outside donations that vary year to year. The Capital Campaign aims to raise a sizable amount of money that would allow for stable, continuous annual funding of these endeavors.

Visit veterinarydentistry.org/capital-campaign to help FVD raise funds for this wonderful campaign!
